FROM TEXAS VET LAB, INC.

The STIMULATOR

Line of Modified-Live Virus Vaccines

Licensed specifically for use in Stocker/Feeder Calves

Now the most complete line of vaccines for entering the stocker and feeder segment. As a cattle professional, you know what is best for your calves, and more importantly, the best way to vaccinate to help prevent costly diseases.

Announcing the availability of **Stimulator.** A complete line of MLV vaccines purposely created by Texas Vet Lab, Inc., to give you more options, not just choices that limit your pathogen coverage or give your calves more than they need.

At the end of the day it's up to you to select the best vaccine program that addresses the specific needs of your operation. With the options now available from Texas Vet Lab, Inc., your choice can be proven killed vaccine favorites, select modified-live, or both.

More Options. Better Choices. Great Combinations.
