

2022 Big Fresno Fair COVID-19 Guidelines

Our Fair Management team has continued to collaborate closely with the Fresno County Department of Public Health on health and safety guidelines for the 2022 Big Fresno Fair. As COVID-19 continues to impact the community, below are the measures recommended to keep you and your family safe while visiting the Fair, as well as measures we are taking to provide a safe and healthy event.

HERE IS WHAT YOU NEED TO DO AS A FAIRGOER:

Before you come to the Fair:

- Ask yourself these questions. If any of them are a YES, then please do not attend.
 - Do I have a fever (100.4 or higher), or any sense of a fever or chills?
 - Do I have trouble breathing, cough, sore throat, nose congestion, headache, muscle aches, fatigue, vomiting, diarrhea or loss of taste or smell?
 - Have I had close contact (longer than 15 minutes cumulative within a 24-hour period and within 6 ft.) with a person who has tested positive for COVID-19 or is in quarantine due to possible COVID-19 exposure?

While at the Fair:

- While masks are not required, if you feel more comfortable in a mask, wear one.
- Wash or sanitize your hands frequently, but especially prior to eating.

HERE IS WHAT WE ARE DOING:

- Staff will be tested for COVID-19 before Fair and then the 2nd week of Fair.
- Enhanced daily cleaning measures, including use of a sanitizing fogger in buildings, bathrooms and throughout the surfaces on grounds.
- Increased hand sanitation stations and hand washing stations throughout grounds.

BE SMART. PLAY SAFE. STAY HEALTHY.

Learn more on how to do that here with great information provided by our partner - the Fresno County Department of Public Health: www.fresnofair.com/stayhealthy
