### Purdue Extension

Purdue Extension helps Indiana build vibrant communities, strong families and profitable businesses on its Main Streets and at its farm gates. Our team—including campus Specialists and Extension Educators in 92 counties—connects Indiana communities to world-class Purdue University research and a network of experts on agriculture, community, families, health and youth development. As part of the Cooperative Extension service, we’re funded by a partnership between federal, state and county government and are part of a network of colleges, universities and the U.S. Department of Agriculture.

## Welcome to the Home & Family Arts Department!

Once again we are planning on having a successful 2024 Elkhart County 4-H Fair. There has been a lot of behind the scenes work by many to prepare for “A Timeless Tradition” fair and open class event.

We hope you plan to attend and participate in the many fair events. There are opportunities to watch livestock shows, walk through the 4-H exhibits, attend concerts, and volunteer. Most of all, we encourage all of you to enter your projects into our Open Class Departments.

Our county is blessed to host one of the best county fairs in the nation. Elkhart County Extension Homemakers has 16 clubs with over 185 members. We are always looking for new fresh ideas and energy. Please visit us in the Home & Family Arts building and ask any of the volunteers how you can get involved.

Club members believe in the present and its opportunities, the future and its promises, and everything that makes life large and lovely while striving onward and upward, improving and endearing the greatest institution in the world... our homes. SEE YOU AT THE FAIR!

1. For food competitions: Filling, frosting, glazing, pie filling, and meringue, (whether uncooked or cooked) are not permitted to contain cream cheese, sour cream, heavy cream, or whipped cream as the nature of these products increases the moisture content and water activity of the food. Foods with a higher moisture content and water activity can be ideal growing conditions for foodborne pathogens, even if the ingredient is part of a batter and baked.
2. Additionally, raw milk, raw milk products or uncooked eggs/egg whites are not permitted. Eggs/egg whites that have been cooked to 160° F (i.e. pasteurized or included as part of a batter and baked) are acceptable.
3. No home-canned fruits, vegetables, or meats are permitted in products.
4. Contestants should carefully wash their hands and make sure that their hands do not have any open cuts before preparing foods. Contestants should not prepare food exhibits for competition within 48 hours of recovering from any illness.
5. Whenever possible, baked products should be transported and stored in chilled coolers (40° F). Only portions of food products will be exhibited except in the Grand Champion. ### Label Example

Processing method: \_\_\_\_\_  
Processing time: \_\_\_\_\_

### Quality Criteria:

Safety is of utmost importance. Any entry exhibiting spoilage or not in compliance with judging guidelines must be disqualified. Quality criteria are based on visual judging only.

### Filled Jar:

- **Headspace must correspond to instructions from the reference guides listed. The top of the project or liquid covering product must provide adequate headspace as stated in approved guidelines.**
- Air bubbles must be kept to a minimum. (Gas bubbles denote spoilage and can be identified by movement of bubbles to the surface of the product while the jar is stationary. Products indicating gas bubbles are present WILL be disqualified.)
- Band should remain in place to transport preserved food and display.

### Heat Process:

- Method used to heat process food must comply with current preserving guidelines as stated in the approved reference guides. The boiling-water process for acid food and pressure process for low-acid food are the only recommended methods.
- Times for heat processing food correctly vary depending on each specific recipe or food type. Processing time must be in agreement with the approved reference guides.

- Color of the finished product should be as close as possible to its natural characteristics or that for cooked product.

- Texture is affected by heat processing; however, the finished product should not appear over-cooked or easily break down.
- Ingredients should retain their shape and size based on the type and preparation method. Cut pieces of uniform size should be packed evenly in the jar yet allow adequate room for liquid to circulate throughout the jar.
