

Team Building Suggestions for your Robotics Team

1. Have your team build a Blindfold Obstacle Course: Have 3 team members create an obstacle course and use verbal instructions to lead the 4th member through the course.
2. Have your team go through the Solo Cup Stacking Exercise. There are many different aspects of this game shown on the internet.
3. Have your team build a catapult with popsicle sticks.
4. Have your team use modeling clay to build a prototype before beginning the robot building process.
5. Have your team create a fun and interesting cover for the notebook that is part of their overall score.
6. Use the Link (Robot Discussion Team Building) found in this section to work with your students to help them understand what robots are and what they are used for in the real world.
