Using the regular messaging app on any smartphone, the smart texting technology allows the citizen to ask questions and get immediate responses, find links to information on the agency's website, address problems, report any issues and upload photos.

According to the Pew Research Center, 97% of smartphone owners text regularly.

The technology analysts at Compuware reported *that 80 to 90% of all downloaded apps are only used once and then eventually deleted* by users.

TextMyGov Solutions:

Communicate, Engage, Boost Website Traffic, Track, and Work

Communicate

TextMyGov uses smart texting technology to communicate with citizens. Local government agencies can answer questions, send links to their website, and provide details on garbage pickup, utility payments, city news, events, office hours, just to name a few.

Engage

TextMyGov uses smart texting technology to engage with citizens. Citizens can easily report issues to any department, such as potholes, drainage problems, tall grass, junk cars. The issue reporting function can be customized for each department and their most commonly reported items. Agencies can engage citizens and ask specific guided questions regarding location, address, street name, and more. If your goal is to engage with citizens and get smart valuable data- You need TextMyGov.

Boost Website Traffic

TextMyGov uses smart texting technology to maximize a cities website. Citizens can text in keywords like festival, parking, ticketing, meeting, sporting event, etc. The smart texting technology can answer the question or send a link from the city's website with additional information. Local government agencies spend thousands of dollars each year on their website. TextMyGov is the best way to benefit from that investment. If your goal is to benefit from your website investment- You need TextMyGov.

Track

TextMyGov uses smart texting technology to track and record all the information that is sent in. Agencies can track the cell phone number, date, and time of every request. If your agency wants to be compliant with FOIA- You need TextMyGov.

Work

Smart texting uses detailed information to track a citizen's request or create a work order. Work orders and requests can be generated and completed. Smart texting allows you to easily collect information like name, location, street address, and allows the user to upload a photo. If your agency wants to track real requests and real work orders submitted by a real cell phone number- You need TextMyGov.
