Feeding Directions

This feed should be offered to deer along with a quality forage source. Deer should be fed up to 2% of their body weight in this feed. Always follow game feeding rules in your area before feeding this product

CAUTION

Do not feed to sheep due to copper levels in this feed.

Always provide a source of fresh clean water, and free choice minerals. When making changes in an animals diet, allow a 7 to 10 day transition period. Provide ample feeder space for livestock. Do not feed wet, moldy, or insect infested feed

This is a high protein and high energy pelleted feed designed to provide the nutrients needed to maximize antler growth during the period of time when bucks are growing antlers. It could also be used to maximize milk production in does and give your fawn crop a good start.
