「*projection*」

Being your on-site provider has its own advantages.

Projection is the official In-House Audio Visual, Production Management, and exclusive rigging provider for the Baltimore Convention Center. This means we're already intimately familiar with every square-foot of the event space—allowing you to maximize the impact of your presentation technology.

The Baltimore Convention Center is stocked with our own state-of-the-art and well-maintained equipment, providing built-in backup gear to easily handle any last-minute pop-up requirements.

Plus, our on-site working relationship with venue staff and partnerships with local labor and vendors ensures that all those servicing your event are always in sync and communicating.

This is just one of the ways we keep our client's best interests at the core of everything we do.

Projection In-House Advantages

- Projection is the exclusive operator of the in-house audio systems at the Baltimore Convention Center. We provide a single vendor solution for meeting room audio, eliminating the expense and inconvenience of setting speakers in meeting rooms.
- Projection is the exclusive provider of rigging services at the Baltimore Convention Center. We provide complete rigging equipment rentals, plan review, and rigging labor in partnership with IATSE Local 19.
- Projection provides complete, turn-key audiovisual solutions for any size event. We support general sessions, breakout meetings, press conferences, exhibit audiovisual, presentation management, livestream / broadcast, lighting, scenic, and event strategy / consultation.
- Instant communication: As part of the in-house team, Projection is in constant communication with key facility staff 24/7 throughout the event. When available, Projection can set meeting room and event spaces without additional room rental costs ahead of time.
- Instant authorization: Our team of dedicated management staff are always on site during your event. We are available for immediate consultation and authorization in emergency situations.
- Projection is an extension of the facility staff. We work closely with your event manager to ensure rooms are set properly and on-time.
- Projection maintains an inventory of audiovisual equipment on site located in key areas around the facility. We have ample backup equipment already on site for rental. Eliminate the cost of equipment shipping, trucking, & dock labor.
- Projection has an experienced and deep bench of local labor who know the facility and our equipment. Projection does not charge for travel, per-diem, hotels, and transportation for event labor.
