You and Jack spent the last few days creating the iVideo montage with pictures, facts and music. You must remember to bring your mom’s iPad to class to present your iVideo.

You are standing in the front of the classroom with Jack, preparing for your presentation. There’s just one problem, you do not know your mothers four digit code to unlock the iPad screen. Everyone is looking at you and Jack, you are beginning to get nervous. The code you thought your mom used didn’t work.

Your job is to determine the four digit code to unlock the iPad and begin your presentation so you do not get a bad grade!

Your mission:

• Visit each decoder and decipher interesting facts about the Texas Revolution. It does NOT matter which order you decode the puzzles.
• You may NOT turn in the 4 digit code unless all clues have been decoded AND all questions have been answered.

How to read a Polybius Cipher

Polybius cipher, or Polybius Square, consists of replacing each letter of the alphabet by its coordinates, or position, on a grid (usually a square).

**Step 1:** Replace the missing letters reading across. You can see the “C” is missing in line 1 (row 1).

**Step 2:** Each letter is represented by **TWO** numbers. The first number indicates the number across the TOP (RIGHT). The second number indicates the number on the left column (DOWN).

**Example # 1:** The letter “C” would be 51. Go across the top to the 5, then down 1.

**Example # 2:** The letter “R” would be represented by the number 24. Go across the top to 2 and down to the 4.

**Scrambled:** Each row contains 5 letters of the alphabet in a scrambled order. Line 1 is letters A-E, Line 2 is letters F-K and so on. The missing letters are in bold and blue.
How to decode a cryptogram (clue #1)

BASIC SOLVING TECHNIQUES:

Fill in as many letters as you can. Once you determine a letter, you can use that letter over for every entry. For example: If you know the word is "THE" and the "H" is represented by the number 22, then every number 22 will be an "H".

• Scan through the cryptogram looking for single-letter words. They're almost always an A or I.
• Scan the numbers: The most frequent number is probably E. It could also be T, A, or O.
• Pencil in your guesses. Be prepared to erase and change your guesses!
• Look for apostrophes. They’re usually followed by D, S, T, M, RE or LL.
• Look for a repeating pattern. They may be common letter groups, such as SH, TH, RE, CH, TR, ING or ION.
• Try to decode shorter words first.
  • The most common two-letter words are OF, TO, IN, IS, and IT.
  • The most common three-letter words are THE, AND, FOR, WAS and HIS.
  • The most common four-letter word is THAT.

**Just enough letters will be given for students to determine letters in other words 😊

You do NOT have to determine every letter of the alphabet, just the ones needed for the clue.
How to read a PigPen Cipher (clue #3)

A PigPen Cipher is a simple substitution cipher. There are 26 symbols, one for each letter of the alphabet. If you break it down, the letters below are represented by the corresponding symbol.

A=Γ  B=Ω  C=Λ  D=Ξ  E=□  F=∏  G=Τ  H=Π  I=Γ
J=Γ  K=Ω  L=Λ  M=Ξ  N=□  O=∏  P=Τ  Q=Π  R=Γ
S=¥  T=↷  U=↶  V=∧  W=∨  X=↷  Y=↶  Z=∧

Example #1:
The letter “E” would be found as the symbol in the red box below. The “E” is found in the middle so it is the symbol of a square.

Example #2:
The letter “R” would be represented by the symbol in green found below. The letter “R” has a line above it and to the left of it with a dot in between the two lines.
