Regional Mitigation Program Application

General

Applicant Information

Applicant: City of Gonzales

County: Gonzales

Program: Regional Mitigation Program: GCRPC - State MID

COG: Golden Crescent Regional Planning Commission (GCRPC)

Phone Number: (830) 672-2815

Address: 820 North Saint Joseph Street, Gonzales, Texas 78629

Website: www.gonzales.texas.gov

Employer Identification Number (EIN): 746001001

Taxpayer Identification Numbers (TIN): 746001001

UEI (Unique Entity Identifier): GNFCLDMG4JN7

Data Universal Numbering System (DUNS): 093785400

SAM.gov Registration Expiration Date: 07-17-2024

Is the applicant an eligible subrecipient applying in conjunction with or on behalf of another entity (non-city) within the county? No

How much funding was the applicant allocated by the approved COG MOD? \$2,999,400.00

Is the applicant participating in the National Flood Insurance Program? Yes

Fiscal Year End Date (Month): September

Fiscal Year End Date (Day): 30

SF-424 Questions

Applicant Type: City or Township Government

Application Title: City of Gonzales Flood and Drainage Project

Is the applicant delinquent on any federal debt? No

Activities

Activity

DRGR Activity	Planned Budget Amount
Flood and Drainage Facilities	\$2,999,400.00

Project

Project Site Title	Street Address
North Pond	2430 Stieren Road
South Pond	1305 Kleine Street

Budget Line Summary

Total Engineering over Total Construction: 15%

Total Admin + Environmental over Total Amount Requested: 3.33%

Allowable Fee Percentage Cap for Admin + Environmental: 8%

Program Budget Code	Planned/Requested Amount
Environmental	\$35,000.00
Grant Administration	\$65,000.00
Planning	\$0.00
Acquisition	\$0.00
Special Environmental	\$0.00
Engineering	\$378,182.61
Construction	\$2,521,217.39

Duplication of Benefits

FEMA Coverage

Did you receive any FEMA funding? No

Do you anticipate any FEMA funding? No

Was the proposed project eligible for FEMA? No

Is the budget in this application funding for the nonfederal share of a FEMA project? No

If yes, have funds been awarded?

If FEMA funds were received, explain why funds are needed above and beyond the FEMA funding:

Insurance Coverage

Did the applicant have insurance coverage on the proposed project? No

Name of Insurance Company:

Amount claimed/received for the project:

If a claim was not filed, please explain below:

Explain why funds are required above and beyond the insurance funding:

Other Funding

Has the applicant submitted a request to fund a part of or the whole project described in the application? No

Are local or other funds available to address the proposed project in whole or in part?

Have any other state and/or federal agencies been contacted concerning funding for the proposed project? No

Disclose source(s) and use(s) of non-CDBG-MIT funds (Each row is a funding source):

Fair Housing

What methods and criteria were used to prioritize the projects in the application, including affirmatively furthering fair housing? The City of Gonzales held a Public Hearing on October 12, 2023, to solicit community feedback on the project.

In addition, the City of Gonzales passes a Fair Housing Proclamation annually during the month of April - National Fair Housing month.

The City of Gonzales passed Resolution 2020-50 affirming the City's concurrence with the Civil Rights Act of 1964. The City of Gonzales has also had a Fair Housing Ordinance since 2002.

What are the identified protected classes, racially and ethnically concentrated areas, and concentrated areas of poverty that may be impacted by this project? The project will benefit all of the persons within a Census Tract 3, Block Groups 1, 3, and 4. The historical flooding patterns of Tinsley Creek adversely affect residents in these areas.

Census-based information has been used to document the LMI beneficiaries of the project because the low mod beneficiaries are 57% of the residents in the three block groups helped by the project.

Provide a meaningful analysis that describes how these identified populations may be impacted by this project. The engineer for the project analyzed historical flood data from Tinsley Creek, along with modeling the flooding. Using this information, flooding from Tinsley Creek impacts CT 3, BG 1,3, and 4. Those with homes around Tinsley creek will benefit from decreased flooding after this project is complete.

For each fair housing activity, provide a name and status. If the activity is Completed, enter the Date Initiated. If the activity is Planned, enter the To Be Completed By date:

Item	Name	Status	Date Initiated	To be completed by
Fair Housing Activity 1	Fair Housing Proclamation	Completed	04-13-2023	04-13-2023
Fair Housing Activity 2	Fair Housing Ordinance	Completed	11-04-2002	11-04-2002
Fair Housing Activity 3				
Fair Housing Activity 4				

Procurement

Have services been procured for Engineering, Grant Administration, or Environmental Services? Yes

Are there any persons/entities with a reportable financial interest to disclose? Yes

City of Gonzales Flood and Drainage Project

Project Info

Project Information

DRGR Activity: Flood and Drainage Facilities

Project Type: Flood and Drainage

Project Title: City of Gonzales Flood and Drainage Project

Does this project include replacement or relocation of a facility (i.e., lift station, water treatment plant, etc.)? **No**

Provide a detailed description of the scope of work proposed. For proposed work involving a length of road, ditch, channel, etc., report the scope of the project in linear feet (lf): **Due to** increase in development and changing weather patterns, the City of Gonzales as seen an increase in flood intensity on Tinsley Creek. In order to mitigate and reduce the frequency of flooding, the city is proposing to install one large detention basin on properties north of US 90-A, and one smaller pond on property south of US 90-A.. This CDBG MOD Grant will be used to perform a detailed study of the watershed, design the detention facilities to aid in reducing flood frequency within the lower two thirds of the watershed, and identify additional locations for future ponds that would benefit this effort. In addition, this grant will be used to construct the initial ponds which are anticipated to be located north and east of Stieren Road and between the TXGN Railroad and Johnson and Kleine Streets as shown in the attached exhibits. The lower two thirds of Tinsley Creek impacts primarily low to moderate income families, Lions Park and multiple businesses.

The proposed initial detention facility is anticipated to be located at or near the location that Tinsley Creek flows under Stieren Road. This facility as contemplated would impact portions of three properties. The properties are owned by the Gonzales Independent School District (GISD), Mark Ploeger and CWM Land Holdings. All of the owners have been contacted and discussion are proceeding pending the outcome of the detailed drainage study to confirm the function of the ponds at this location and the exact impacts to the properties. MOU s are anticipated to be signed on these properties before the end of 2023.

The second detention facility is proposed to be located on property owned by BYK. Discussions are on going with management of BYK, and it is anticipated that an MOU could be approved by the end of 2023.

Based on preliminary conceptual design as illustrated in the attached exhibits, the pond on the north and west of Stieren Road would include an 8 to 10 acre wet pond, inundate up to 20 acres of land and contain approximately 120 acre feet of detention volume. In addition, a pond would be created on the east side of Sieren Road on approximately 12 acres owned by GISD. This pond would be connected hydraulically through a culvert under Stieren Road to the westerly pond and would contain an additional 36 acre feet of volume. This pond would be usable by the school district most of the time and could be designed to be multifunctional by creating an area that would ultimately include playgrounds, practice fields and intramural sports facilities. The

BYK pond would utilize approximately 16 acres of land and contains around 80 acre feet of volume.

Almost 1600 acres of land drains to St. Andrew Street via Tinsley Creek. Neighborhoods directly north of St. Andrew Street along Johnson Street experience significant flooding as well as many neighborhoods south of St. Andrew Street as Tinsley Creek finds its way to St Vincent Street. The proposed detention facility will capture approximately 550 acres at the upper end of this drainage basin and help to slow and reduce the rate of runoff from this area to allow the lower portions of the watershed to drain before drainage from the upper portion impacts these areas.

This CDBG MOD Grant will aid the City of Gonzales in developing a detailed drainage study of Tinsley Creek, performing boundary and topographic surveys of the areas proposed for detention facilities, designing and preparing construction documents for the proposed detention facilities, and bidding and constructing these detention facilities. Reducing the frequency and intensity of flooding on Tinsley Creek is a high priority for the City of Gonzales and this grant will provide the opportunity for the city to make significant strides towards this goal.

Site: Project Site Title	Site: Street Address
South Pond	1305 Kleine Street
North Pond	2430 Stieren Road

Describe a plan for the long-term funding and management of the operations and maintenance of the project: **The City of Gonzales will maintain a vegetated buffer around the detention pond and will select plants within the detention zone that can withstand both wet and dry periods.**

In addition, the ponds will be constructed with a micro pool at the outlet to prevent resuspension of sediment and outlet clogging. Maintenance access will be provided and the outlets will be checked and cleaned on a semi-annual basis. The City of Gonzales will provide the funding/labor for the regular maintenance of both the north and south detention ponds.

Total proposed number of linear feet: **1,334,076.396**

Total number of proposed public facilities:

Project Phase	Start Date	End Date	Length (in months)

Native/Black African American			

Which HUD national objective does the project meet? **LMI**

Describe activities that benefit low- and moderate-income people: **Flood mitigation for low-mod areas and protection against property loss.**

Method(s) used to determine the beneficiaries: **LMI Area Benefit**

What method was used for Beneficiary Identification? **Census (HUD LMISD)**

Provide a brief description of the beneficiary identification method used to determine this national objective and upload supporting beneficiary maps, census data, and/or survey documents: **LMISD Census data for the impacted areas was used to determine the low mod beneficiaries for this project. The project will benefit all persons within Census Tract 3, Block Groups 1, 3 and 4. This historical flooding patterns of Tinsley Creek adversely affect residents in these areas. The low-mod average of the area is 62.04%**

U.S. Congressional District #: **27**

Texas Representative District #: **44**

Texas Senate District #: **18**

Environmental

What is the current status of the project? **Not yet begun**

Will the assistance requested have any negative impact(s) or effect(s) on the environment? **No**

Is the proposed project likely to require an archaeological assessment? **No**

Is the proposed site(s) listed on the National Register of Historic Places? **Yes**

Is the project in a designated floodway or coastal high hazard area? **No**

Is the project in a designated special flood hazard area or a designated wetland? **No**

For projects in the 500 or 100-year floodplain: Does your project involve a critical action as defined in 24CFR55.2(b)(3)?

Is any project site located in a known critical habitat for endangered species? **No**

Is any project site a known hazardous site? **No**

Is any project site located on federal lands or at a federal installation? **No**

Is any project site subject to or participating in Fixing America's Surface Transportation Act (FAST-41) (P.L. 114-94)? **No**

What level of environmental review is likely needed for this project? **Environmental Assessment**

Provide any additional detail or information relevant to Environmental Review: **Project will require an Environmental Assessment**

Provide a brief narrative regarding how CDBG-MIT funding is to be used. Demonstrate that HUD CDBG environmental requirements have been met to date:

Permits

Does the project require any federal, state, or other permits, approvals, or waivers to complete the proposed work? **No**

If yes, describe the type and purpose of each permit and its association with the proposed project. Provide a copy of each permit already executed:

Does the project require any type of ratified, legally binding agreement between the applicant and any other entity to provide continual operation upon completion? **Yes**

If yes, describe the type and purpose of each agreement and its association with the proposed project. Provide a copy of each agreement already executed or drafted: **MOU granting easement for the project. Will be executed when project is approved. Property owners have already provided verbal consent.**

For sewer and/or water facilities projects, does the applicant currently hold the Certificate of Convenience and Necessity (CCN) for the target area proposed in the application? (If not a sewer and/or water facilities project, please choose N/A): **N/A**

Budget Activity Lines

Program Budget Code	Planned/Requested Amount	Planned Other Funds Amount	Total	Percent of Total
Environmental	\$35,000.00	\$0.00	\$35,000.00	1.2%
Grant Administration	\$65,000.00	\$0.00	\$65,000.00	2.2%
Planning	\$0.00	\$0.00	\$0.00	0%
Acquisition	\$0.00	\$0.00	\$0.00	0%
Special Environmental	\$0.00	\$0.00	\$0.00	0%
Engineering	\$378,182.61	\$0.00	\$378,182.61	12.6%
Construction	\$2,521,217.39	\$0.00	\$2,521,217.39	84.1%

Mitigation

Identify the specific risk the proposed project will mitigate against: **Riverine Flooding**

Describe as to how the proposed project addresses/mitigates against the current and future risks identified: **Almost 1600 acres of land drains to St. Andrew Street via Tinsley Creek. Neighborhoods directly north of St. Andrew Street along Johnson Street experience significant flooding as well as many neighborhoods south of St. Andrew Street as Tinsley Creek finds its way to St Vincent Street. The proposed detention facility will capture approximately 550 acres at the upper end of this drainage basin and help to slow and reduce the rate of runoff from this area to allow the lower portions of the watershed to drain before drainage from the upper portion impacts these areas.**

Provide information about how the proposed mitigation efforts integrate into the community's emergency and resiliency plans: **City of Gonzales in developing a detailed drainage study of Tinsley Creek, performing boundary and topographic surveys of the areas proposed for detention facilities, designing and preparing construction documents for the proposed detention facilities, and bidding and constructing these detention facilities. Reducing the frequency and intensity of flooding on Tinsley Creek is a high priority for the City of Gonzales and this grant will provide the opportunity for the city to make significant strides towards this goal.**

In the space provided, list documentation provided to support the identification of the threat or hazard and how it relates to potential impact: **The documentation provided is the Gonzales County Hazard Mitigation Plan, along with the Guadalupe/Blanco River Authority Hazard Mitigation Plan.**

Provide a brief description of how the proposed project addresses an integrated approach to mitigation: **The proposed detention ponds will protect the homes most likely to flood in a heavy rain event. As in most communities, lower income residents settled primarily areas where land was less expensive and more prone to flooding. This project protects against that and furthers fair housing and economic justice. The project also protects that rail line which is an economic driver for the City of Gonzales.**

Considering the local evaluation of hazard risks, responsible floodplain management, future extreme weather/natural disaster events, and long-term risks, describe how the proposed project promotes sustainable community resilience: **An analysis of the various flood stages of Tinsley Creek has been performed. At 43 feet (major flood stage), will close US 183, SH 97, and FM 108 as runoff from Tinsley Creek in Gonzales adds to the Guadalupe River backwater, causing flooding of the lowest homes near the creek. Secondary roads and streets near the river would also flood and be dangerous to motorists.**

At 45 feet, the river flow reaches the floor of the old power plant and to the slab of the electric plant. Water is several feet deep in the baseball park and concession buildings in Independence Park. Flooding is several miles wide in the flood plain just northwest of Gonzales. Flow approaches lower homes in the Tinsley Creek flood plain in Gonzales as the Guadalupe River backs up. Any flow down Tinsley Creek over the backflow can flood homes.

At 48 feet, the flow passes through the windows of the old power plant. All highways into town are flooded except Highway 97 north. Nearly all Independence Park is under several feet of

water. The floodplain northwest of Gonzales below the Guadalupe-San Marcos Rivers confluence is several miles wide. The lowest homes along miles of Tinsley Creek are flooded as the Guadalupe River backs into it. This project captures the riverine flood waters so that the homes surrounding the river do not flood during heavy rain events.

Describe how the proposed project is consistent with local and regional planning efforts to effect disaster mitigation: The riverine flooding which occurs during heavy rain events is identified in the Gonzales County Hazard Mitigation Plan as the highest threat. During Hurricane Harvey, the portion of the Guadalupe River that runs through Gonzales was at Flood

Stage 42.1 feet. Flood stage for the river is 31 feet. During heavy rainfall, flooding closes Highways 183, 97 and Farm to Market 108. The runoff down Tinsley Creek in Gonzales adds to the Guadalupe River backwater, which floods the lowest homes near the creek. Secondary roads and streets near the river are flooded and dangerous to motorists.

The project now underway will increase the flow capacity of the Guadalupe River and Tinsley Creek. Improvements include:

- 1) Replace a low water crossing with 6 culverts at Johnson Street
- 2) Add 4 new culverts between Tinsley Creek and St. Andrew Street
- 3) Replace box culvert crossings with free span bridge crossings at St. Andrew Street, St. Lawrence Street, St. Louis Street, St. Matthew Street, St. Michael Street and St. Vincent Street. These free span bridges will allow Tinsley Creek to flow unimpeded through these crossings.

The detention ponds that are proposed in this project works with this existing project to further prevent the flooding during heavy rain events.

Was a cost-benefit analysis used in the selection of the proposed project? No

Describe how the proposed project impacts vulnerable populations in the local community.: The proposed detention ponds will protect the homes most likely to flood in a heavy rain event. As in many communities, lower income residents in Gonzales, Texas, settled primarily in the more affordable areas which were often more prone to flooding. This project protects against that and furthers fair housing and economic justice.

Describe how the proposed project creates economic opportunities for the local community: The project protects that rail line which is an economic driver for the City of Gonzales. The project will also provide employment opportunities for the nearby community.

Does this project disproportionately impact vulnerable populations in the local community? No

Does the proposed project align with investments from other state or local capital improvements and infrastructure development efforts? Yes

Does the proposed project employ adaptable and reliable technology to guard against premature obsolescence? Yes

Describe the applicant's overall mitigation plan and how the project addressed in this application furthers that plan: The City of Gonzales flood damage prevention ordinance recognizes that flooding may occur outside of FEMA SFHAs and has an elevation requirement for construction within 1' of the centerline of a known but unmapped water course, including intermittent water courses.

The City's ordinance also requires 1' of freeboard or watertight construction to a minimum level of 1' above the base flood elevation for non-residential construction.

Regarding manufactured housing, in cases where flooding has previously caused substantial damages, there is also a freeboard requirement of 1'

The City of Gonzales also controls construction in the floodplain through its subdivision ordinance. The ordinance outlines specific requirements that must be met before land located in a special flood hazard area may be subdivided.

Describe how the proposed project will contribute to the community's resiliency against future disasters as a result of these projects: As history has shown, heavy rain events and flooding occur within the City of Gonzales. This project will work with other mitigation measures to protect the lives and property of some of Gonzales' most vulnerable residents.
