NOTICE TO PROPOSERS

ADDENDUM #1

On August 7, 2023, proposals for Sign Installation & Repair Services were released.

The purpose of this addendum is to provide all proposers with a copy of the questions and answers that have been requested in addition to providing supplemental information to the specifications and extending the due date of the proposal.

QUESTIONS & ANSWERS

1. Are the sign installations for new locations around the Expo from the ground up or will concrete bases need poured?
 - The Pavilion sign has a concrete base in place. The Exchange Center sign will need a concrete base poured.
2. Are these sign installs for current signs established around the Expo and we will be replacing them with new installations?
 - These will be replacement signs that have been damaged beyond repair.
3. For Pavilion large sign with LED display, what pixel pitch display are you looking for?
 - 8mm
4. The mockup doesn't show if the sign is illuminated or not. If this is illuminated, which part of the sign is illuminated?
 - We are open to suggestions and ideas. Ideally the Pavilion and Exchange Center signs would be illuminated at the top. The potentially have halo back lighting around the X flags.
5. Is it possible to get a color mockup?
 - These mockups are not final. If the number of colors changes prices, please mention in the rfp response. The design will most likely consist of 3 blue colors and white.
6. There is "EXPO SQUARE" on the concrete base, how is it done?
 - We are open to suggestions. This could be chiseled, debossed or precast. Similar to gate entries.
7. For Exchange Option 2 sign, what material do you want to use for the sign face? Aluminum or flexface?
 - Most likely aluminum, then the Exchange Center and flags could be backlit panels.
8. Will the electric be supplied to the sign?

Real Entertainment. Real Events. Real Exciting!

- Both previous signs had electric. Vendor will connect to existing electric.
9. Is the electrical hookup on Expo or the vendor?
- The vendor will connect electric to existing electric.
10. Besides the damage to the sign at the main front gate, are there any other signs in need of repair?
- Yes, there are several signs that will need repaired due to the storms in June. None of them are digital though. This includes signs on the barns and Central Park Hall. Awarded vendor will get a list of repairs needed to provide pricing on after the fair.
11. Was there any damage to the Daktronics video boards at the main gate sign?
- No
12. Are you wanting any repairs to the Daktronics video board performed?
- No, the Daktronics boards at the gates are covered by a warranty at this time.

Proposals are now due by 11:00 a.m. on September 7, 2023, and will be opened by TCPFA on September 7, 2023, at 1:00 p.m.

Respectfully yours,
