Their conduct in this competitive environment shall always show standards of honor and dignity to promote the advancement of agricultural education. This code applies to junior as well as open class exhibitors who compete in structured classes of competition. This code applies to all livestock offered in any event at a livestock show. In addition to the "IAFE National Code of Show Ring Ethics," fairs and livestock shows may have rules and regulations which they impose on the local, county, state, provincial and national levels.

Their moral values must be so certain and positive that those younger and more pliable will be influenced by their fine example. Owners, exhibitors, fitters, trainers and absolutely responsible persons who violate the code of ethics will forfeit premiums, awards and auction proceeds and shall be prohibited from future exhibition in accordance with the rules adopted by the respective fairs and livestock shows. Exhibitors who violate this code of ethics demean the integrity of all livestock shows. Livestock shall not be exhibited if the drugs administered in accordance with federal, state and provincial statutes, regulations and rules affect the animals performance or appearance at the event.

Rules for Sheep and Goats

The Rule: The USDA has enacted a mandatory program to eradicate the disease scrapie from sheep and goats in the US. The program requires an official ID on sheep and goats. The rule also states that sheep and goats for exhibition (shown at fairs) are required to have an official scrapie ID. (Goats may have an ID tattoo.)

What is scrapie? Scrapie is a fatal, degenerative disease affecting the central nervous system of sheep and goats. Animals sold from infected flocks spread scrapie to other flocks. The presence of scrapie in the U.S. also prevents the export of breeding stock, semen, and embryos to many other countries.

How does this apply to our fair? The rule clearly states that all breeding sheep and goats at the fair are required to have an official scrapie ID. At a minimum, all market sheep and goats except castrated males under 18 months of age are required to have an official ID. However, it may be easier for us to expand the tag requirement to all sheep and goats rather than to have to differentiate between ewe and wether lambs. This recommendation is endorsed by the Montana Scrapie Committee.

WOOL—OPEN CLASS

The purpose of this division is to educate wool growers toward producing higher value fleeces. Twelve months' growth of wool is the maximum permitted, except in the case of yearling fleeces. All entries must be in the name of the grower. **Factors affecting exhibit are:** *Twine used in tying fleeces; excessive dung locks or tags; discoloration by excessive moisture; and weakness of staple.* Fleeces should be rolled in clear plastic bag, flesh side out, in a manner to allow their being handled without falling apart.

Do not enter a class number. This will be determined by the judge.

Dept J-Division 2 - Sheaf

For proper ripening, sheaf grain can be from the previous year. Get into the field a few days before grain is ready to cut with the binder, select a few samples and with a knife cut close to the ground so as to get the full length of the straw. Be careful not to break the straw in handling. Spread the sample on a board in the sun to bleach. See that samples never get wet after being cut. When green color is entirely gone and straw is perfectly dry, bind them together in bundles, tying them with a soft cloth which will not cut the straw. Make bundles from three to four inches in diameter, just below the head and tie securely in at least three places, and then hang in dry place with head down until time for exhibiting. Sunflowers: Bring four stalks cut at ground level.

Scoring:

Uniformity-In variety, length of head, color and condition - 40%

Quality and Adaptability-Shall be cured of good quality grain and straw. Leaves stripped off adapted to locality in which grown - 30%

DEPARTMENT K - VEGETABLES - ROOT CROPS - POTATOES - HORTICULTURE

Hints to Exhibitors:

- The outstanding points to be considered in selecting a vegetable exhibit are quality and condition. The judging of a vegetable exhibit is generally based on the readiness of the products for immediate use. The quality of the product is determined by actual test.
- Condition and Quality also include the points of freedom from disease, insect work, mechanical injury and defects. Vegetable exhibits should comprise specimens which are almost perfect from physical standpoint.
- Medium sizes are generally preferred to the very large sizes. Uniformity, a point which applies to exhibits that include more than one specimen is particularly important.

Following are some points to be especially observed with each type:

DEPARTMENT N - NEEDLEWORK

Because of constant differing opinions of who is to be considered a "Pro" or "Semi Pro" there are classes to insure a place for all who wish to exhibit and be fairly judged among their peers listed as "Professional" or "Adult."

Professional refers to work produced primarily by:

- a) Those who sell their work.
- b) Those having a diploma, certificate, degree, or three or more years of training.
- c) Those that teach or have taught that category.

Adult- (18-64) & (65 & up) refers to those who:

- a) Do not derive income directly from their work.
- b) Have had little or no formal training in it.
- c) Does the work for pleasure, and is often referred to as a "hobbyist."

- An exhibitor is allowed to make only one entry in each class.
- Articles must be the work of the exhibitor.
- No premiums will be awarded for articles which have been purchased, received as gifts, borrowed, soiled, unfinished or previously exhibited.
- No articles will be offered for sale.
- Bring small articles in plastic bags.
- Pin tags on the front of the item.
- Return exhibitor tags to office for entries not exhibited.
- Judging will award prizes according to the merits of each exhibit. Absence of competition does not justify awarding a high prize to an exhibit of medium or inferior quality.

All needlework will be judged with regard to beauty, degree of perfection, amount of work, suitability for purpose for which it is intended and cleanliness. Excellence in sewing is determined in part by width and evenness in size of seams, hems, gathers, darts, pleats, and tucks. Overall appearance of work should be neat. It should be pressed or blocked, aired, bastings removed, everything finished and ready to use.
