Exhibits shall be arranged so they do not obstruct the general view or hide the exhibits of others. Plans for specially built displays not in accordance with the Show regulations must be submitted in writing to the Show Management at least 30 days prior to Show opening. Exceptions to this rule exist in some locations. Check with Show management for your booth location. See "Booth Specifications" for diagram.

EXHIBIT BOOTH SPECIFICATIONS

BOOTH DESIGN: Your booth set up and spacing MUST BE INCLUSIVE of the grid used to hold your walls upright. Example if your booth is a 10' x 10', your 100 square feet MUST include whatever display materials or bracing used to hold up your booth.. You may not extend into another's space. If your grid extends into another's space, you may be asked to remove whatever it is that is obstructing another's use of their contracted space.

DRAPING:

Indoor booths are provided the following: one (1) eight (8) foot tall backdrop, two (2) 3 foot side drapes and a company identification sign. The 8' side walls or drape is an exception to the rule and must be requested in advance via email to ashley@fwssr.com.

DISPLAY: Any unfinished wall, sign or exhibit decoration facing the public or another booth must be masked and/or covered by the Exhibitor. Exhibitor may provide own masking, such as black cloth or rent draping from Freeman Decorating. This includes the back of any signage that may be seen from another booth or aisle. Please not you may NOT go above 10' unless you are a building or on the East or West wall. This has been a growing problem and vendors are no longer asking – they are doing. You will be asked to remove anything above the drapeline. If you have been approved in writing, to extend taller than 8', the back of whatever the display item is must be covered and not obstructive or infringing on the display behind you. IF it does, we will ask that it will be removed.

ELECTRICAL BOXES:

Exhibitors and Lone Star Electric must have access to built-in electrical boxes at all times. Do not cover them with booth display materials.

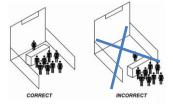

EXHIBIT FLOOR PLAN / LAYOUT:

Every effort is made to ensure the accuracy of all information contained on all floor plans. However, no warranties, neither expressed nor implied, are made with respect to the floor plan. If the location of building columns, utilities, or other architectural components of the facility is a consideration in the construction or usage of an exhibit, it is the **sole responsibility of Exhibitor to physically inspect the facility to verify all dimensions and locations.**

HEIGHT RESTRICTIONS:

Exhibit booth, **may NOT exceed an overall height of ten (10) feet and must be freestanding.** Booths may extend to eight (8) feet high on the sides of the exhibit but this height extension **MAY NOT** extend more than 50% from the back of the booth (*for a standard 10' x 10' booth, the sides may extend five (5) feet from the back of the booth)*. Draping, or an appropriate covering, must be provided for this additional height. All exposed sides of booth must be draped or covered appropriately. Side walls MAY NOT be taller than four (4) feet. Do NOT place, hang or set ANYTHING in this opening. Nothing in, or about, the exhibit booth may interfere with the sightline of any other booth. *Exceptions to this rule exist in some locations*. Check with Show management for your booth location. If you have an existing variance nothing has changed until your neighbor changes and then the exhibit manager will open dialogue for an acceptable compromise.

Solid 8' Side-Walls are permitted for ONLY the Back 50% of Booth Depth Corner Posts for Support ONLY – BOOTH MAY NOT BLOCK THIS OPEN AREA

LANDSCAPING:

If watering is required, provisions must be made to prevent water runoff. Water accessibility is very limited. Arrangements should be made in advance to ensure a booth will have access to water.

OBSTRUCTIONS & DEMONSTRATIONS:

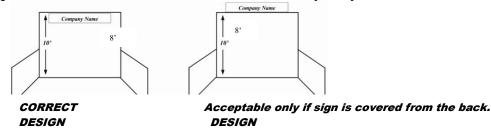

Each Exhibitor has the responsibility to assure proper flow of pedestrian traffic through the exhibit buildings. Aisles must be kept clear and free of obstruction at all times.

PERMANENT FIXTURES:

Permanent utility fixtures in the building, such as air-returns, fire extinguishers, fire pull boxes, fire hoses, etc., must never be blocked. All fire equipment MUST ALWAYS be visible and accessible.

SIGN / SIGNAGE:

After December 1, changes may be made with an Exhibitor fee to Freeman. Booth Signage: Absolutely no hand-drawn or marker signs are allowed. Signs must face the inside of the booth. Signs adjacent to any booth must be covered on the backside so they do not show in the other booth. Exhibitors desiring to erect a sign over ten (10) feet must receive written approval from the Commercial Exhibits Manager 30 days in advance of the Show opening. Signs will NOT be attached to the ceiling or any other attached facility item for suspension or support. Signs may be hung from the back wall of their booth as long as the method used does not damage booth draping material. Signs must be professionally made and fit within booth dimensions without blocking the view of any other exhibitor. Signs may not exceed ten (10) feet above the floor without prior approval. If your sign or banner is approved to extend above your booth – signage must be one sided and not be visible in the booth behind you or you will be asked to remove it.

STORAGE:

Storage is not allowed behind the back drapes, display wall or inside the display area unless the exhibit has a specific provision for lockable storage.
