1. Access to Rural Equine Veterinarians

Prompt:
Why is access to equine veterinary care limited in many rural communities, and how does this affect horse health and welfare? Discuss the challenges veterinarians face when providing care in rural areas and potential strategies to improve access to veterinary services.

2. Equine-Assisted Activities and Therapies and Its Impact

Prompt:
Equine-assisted services support individuals facing physical, emotional, cognitive, and developmental challenges. What benefits do these programs offer participants, and how do horses serve as effective therapeutic partners? What key operational and financial challenges do equine-assisted programs face today?

3. Artificial Intelligence in the Equine Industry

Prompt:
Artificial intelligence is increasingly being used in the equine industry. How can AI technology be applied to improve horse health, welfare, and overall industry efficiency? What are potential limitations or concerns associated with its use?
