FLORICULTURE: FLOWERS DEPARTMENT 8

DIVISIONS 801 - 808

Superintendent – Riverton Garden Club Premium Table #3

*Begin Arrival of Floriculture Exhibits; Wednesday, August 3, 6 p.m. – 8 p.m. Final Arrival of Floriculture Exhibits: Thursday, August 4, 7 a.m. – 9 a.m.

Policies:

- 1. One entry per class per exhibitor.
- Stems should be uniform and the blooms of uniform size. Cut flowers should be shown with the foliage, if naturally attached to specimen. Remove all leaves under water. No foreign foliage should appear in single variety exhibits. Mixed bouquets should not be entered in the specimen classes. Display the number of stems requested.
- The container used for specimen of cut flowers should be clear, glass jars suitable to the size of the specimen. The department takes no responsibility for containers brought for exhibits.
- 4. Exhibitors in this department may replace exhibits with fresh flowers any time during the week.
- Judging of entries in this department are to be based on the following characteristics: a) cultural perfection, b) true color to type, c) exact number of blooms
- 6. Entries must be tagged and checked in with superintendent.
- 7. If the exhibit needs support or a display stand, the exhibitor must provide.
- 8. Sweepstakes and best of Show awards will be determined by the person acquiring the most points by ribbons in this division. Values are Blue; 3 pts., Red; 2 pts., White; 1 pt.
- 9. Youth classes ages 9-18 years. Each exhibit shall be scored as blue, red, or white. Youth are encouraged to enter any floriculture class. Divisions 702, 704, 706 and 708 are for youth.
- 10. No toxic plants or flowers.

Definitions:

<u>Bloom:</u> one individual flower (example: rose)
<u>Spike:</u> several flowers on a long stem (example;

Spray: single stem with terminal buds or flowers and two auxiliary buds, flowers and foliage. (example: petunia)

<u>Stem:</u> main ascending part of plant, not over 18 inches (example; delphinium)

Everlasting flowers: flowers that retain their color and form when dried. Many everlasting flowers are composed of colorful, papery petals called bracts that are stiff and dry while still attached to the living plant. (example; Strawflower, Everlasting Flower, Yellow Paper Flower

*Entries will be judged on uniformity of bloom size and color.

HOW TO HARDEN OFF YOUR FLOWER EXHIBIT

If a flower is to remain fresh throughout the exhibit period, it should be cut not later than the day before it is to exhibit. It is generally recognized that afternoonespecially cutting in late afternoon, when the greatest amount of sugar has ascended in the leaves and blooms — as well as a "hardening off" process will help insure a winning entry.

Flower stems should be cut cleanly at the angle with a sharp knife or pruning shears and plunged in to deep, hot water: 110 degrees Fahrenheit is ideal. Plunging plants up to their necks in cool water works as well. It is a good practice to carry a bucket of water to the garden and to place each cut specimen in the water at once. Lightly crush the base of woody stems on plants such as lilacs to improve the intake of water. Some flowers, such as Dahlias, and Poppies, need to have the cut tips seared over an open flame.

Following cutting and water treatment, specimens should be placed in a cool, darkened room. After several hours, when the water has come to room temperature, add ice to the water and leave the flower material undisturbed overnight or place flowers in a refrigerator or cooler at a temperature between 38 and 40 degrees for six or more hours before they are to be shown. Flowers prepared in this way improve their substance and will hold their freshness longer.

WINNING SUGGESTIONS BY RIVERTON GARDEN CLUB

Collect flowers to be exhibited the evening before and place them in a pail of warm water (110). Set the pail in a cool place or refrigerate 12 -24 hours. Be sure to use a very sharp knife to cut the specimen bloom. To exhibit, leave attached as much stem and as many leaves as possible. Do NOT leave any leaves under the water. Check for dirt, bugs and discoloration on the leaf underside. Remove excess blossoms close to the stem, leaving no knobs.

To seal Dahlias and Poppy, dip cuts in boiling water or flame sear, hold flower at angle away from heat. Store in dark, draft free place in deep, warm water for 2 – 4 hours before handling. Preservative is OK. Protect during travel. Grooming guide: 50% of stem should be underwater. NO foliage below waterline. Foliage underwater will rot quickly. Remove dead and damaged parts. Disbud single blooms. Hybrid Tea Rose should be ½ to ¾ open.

FLORICULTURE: SPECIMENS Divisions 801 - 802

Division 801: Adult Division 802: Youth

Specimens	CLASS
Agastache (Hummingbird Mint). 3 stems	001
Aster, 3 stems (one or more colors)	002
Bachelor Buttons, annual, 3 stems	003
(one or more colors)	
Bachelor Buttons, Perennial, 3 stems	004
Bee Balm, Monarda, 3 stems	005
Begonia, Tuberous, 1 flower	006
(can be floated)	
Begonia, wax, 3 stems	007
Bells of Ireland, 1 stem	800
Calendula, 3 stems	009

POTTED PLANTS

Divisions 803 - 804

Division 803: Adult Division 804: Youth

POTTED PLANTS	CLASS
African Violet	001
Coleus	002
Fern	003
Geranium	004
lvy	005
Hanging plants, flowering, indoor	006
Hanging plants, foliage, indoor	007
Any other flowering indoor plant	800
Succulent or Cactus	009
Fairy or Miniature Garden*	010
Terrarium (3 or more plants)*	011
Desert Garden*	012
Dish Garden*	013
Herbs or Herb Garden	014
Potted Flowers, flowering outdoor	015
Potted Flowers, foliage, outdoor	016

*Descriptors of Classes

Dish Garden: An open/shallow container featuring a variety of plants excluding cacti and succulents.

Fairy or Miniature Garden: A miniature "scene" contained in an open container and featuring miniature or small, slow growing houseplants. The garden needs to have an imaginative theme and added miniature accessories.

Desert Garden: An open/shallow container featuring cacti and /or succulents.

Terrarium: A transparent container, partially or completely enclosed; sealed or unsealed.
