## **Division II Digital Arts**

### **Class 1 - 2**

1. Digital Photographic Compositing: Digital Photographic Compositing is the use of photographic images from a variety of shots utilized to create the final scene. The final piece could be a collage or take on the feel of a surrealistic photographic scene. However, the final piece must be photographic in nature.
2. Photo Manipulation: Photographic sources altered with digital special effects or filters. Images for this category are for work that could look photographic, abstract or painterly. The process should entail photographic image or images where digital effects and filters are used to go beyond a photographic look. Appropriate techniques include digital images with more sophisticated layering techniques of imagery, photos smudged or cloned to look like paintings but which maintain the composition of the original photographs, filter effects on digital photos or modifications of color, such as posturizing, extreme saturation or de-saturation.
