

How Milk Gets From the Farm to Your Table

Indiana is the home to approximately 1000 dairy farms.

The average number of dairy cows on a farm is 140.

On average a dairy cow produces nine gallons of milk a day.

On average it takes 2 days for milk to go from the farm to the grocery store.

Milk is delivered to stores for consumers.

Milk is delivered to a processing plant to be tested and bottled.

Indiana ranks number 14 in milk production in the United States.
