INDIANA STATE FAIR COMMISSION
RFP-SER202100338**

DATE: AUGUST 23, 2021

RE: INDIANA STATE FAIR COMMISSION – FRIABLE ASBESTOS CONTAINING BUILDING MATERIALS ABATEMENT – PUBLIC SAFETY BUILDING AND SWINE BARN, INDIANA STATE FAIR GROUNDS

This Request for Proposal (“RFP”) is the official notice that the Indiana State Fair Commission, an Indiana body corporate and politic established at Ind. Code § 15-13-2-1, (the “Commission”) is seeking proposals from qualified vendors to provide friable asbestos abatement for up to two facilities at the Fairgrounds facility commonly known as the Public Safety Building and Swine Barn. The intent of the Commission after the review and evaluation of responses is to enter into a contractual agreement with one or more qualified vendor. By bidding on these services, you are guaranteeing pricing as set forth in this ITB.

I. Overview

Under Indiana Code section 15-13-3-2, the Commission is responsible for the administration of the Indiana State Fairgrounds and property owned by the Commission to provide for maximum use for the benefit of the citizens of Indiana. The Commission is a separate body, corporate and politic under Indiana law and its members are appointed by the Governor.

The Indiana State Fair Commission intends to modernize the Swine Barn pavilion, replacing a large portion of the existing structure with a facility that, by its intended design, offers climate controlled year-round opportunities for Fairground events. The replacement of the existing structure requires the demolition of certain existing buildings, commonly known as the Public Safety Building and the Swine Barn (though a portion of the historic Swine Barn shall be retained).

The Fairgrounds awarded and conducted a pre-demolition Regulated Asbestos Containing Material Surveys (“RACM”) from the fall of 2019 to spring of 2020, which is referenced in the three survey reports attached hereto. These reports indicate the finding of friable asbestos materials in multiple areas of both the existing Swine Barn and the Public Safety Building (called “Operations Building” in the accompanying survey). These are the most recent reports possessed by the Commission regarding these properties and there have not been material changes to the property conditions since these reports were generated.

The Exhibit A surveys also indicate the finding of Lead Based Paint in both the Swine Barn and the Public Safety Building. Lead Based Paint materials removal, as recommended in Exhibit A, is not scoped in this RFP. It is required, however, that vendor awarded this work must demonstrate their workers assigned and working on these sites have been trained in lead-safe working practices via worker training and certification documentation. During asbestos abatement, vendor shall not conduct lead based paint prohibited practices such as:

- Open-flame burning or torching of lead-based paint

- The use of machinery that remove lead-based paint through high-speed operation such as sanding, grinding, power planning, abrasive blasting, unless such machines are used with a HEPA exhaust control
- Operating a heat gun on lead-based paint at temperatures greater than 1100 degrees F°
- Extensively dry scraping and sanding by hand
- Heat guns that char paint
- Paint stripping in a poorly ventilated space using solvents or other volatile paint strippers.

II. Summary of Scope of Work

For the Indiana State Fair Commission to proceed with the Swine Barn partial demolition and reconstruction, it is necessary to abate any friable asbestos containing building materials prior to commencing demolition of these buildings.

Following the release of this RFP, interested bidders may join a video conference on Wednesday September 8th at 1:00pm EST to further detail the building specs and work scope, including Q&A which will be published following the video conference. If interested in participating in that conference, please send an email to jscism@jsheld.com the week prior to that broadcast date. We can make the buildings available for individual inspection with advance notice and based on availability during current State pandemic rules and restrictions. If you are interested to do so, you may contact the same email aforementioned to schedule a physical building inspection.

A. Asbestos Abatement – General Scope

Vendor shall include all costs to abate all friable asbestos contaminated building materials (“ACM”) noted on Exhibit A (three survey reports for Operations Building and Swine Barn/Facilities). ACM reported generally as:

- 1,200 LF of thermal system insulation located in the Operations Building
- 60 hard thermal system insulation fittings located in the Operations Building
- 2,700 LF of thermal system insulation located in the Swine Barn Maintenance Shop
- Approximately 65 square feet of non-friable floor tile in the 2nd Fl. Restroom of the NE Swine Barn Tower

Vendor shall also provide general pricing by Linear Foot for thermal insulation uncover and removal, as well as pricing by Square Foot for ACM floor tile and mastic, for currently unknown ACM abatement but encountered during this work. Any such material, upon discovery, shall be determined as ACM via commercially accepted evaluation and the Commission or its representatives notified by vendor in advance of abatement. The Operations Building and Swine Barn/Facilities will be vacated prior to this abatement work, thus vendors need not be concerned about limited demolition or returning either facility to conditions “as found.”

Vendor shall add an unforeseen condition environmental abatement allowance of \$5,000.00 to their proposal to cover any conditions encountered during demolition of both the existing Public Safety Building and Swine Barn Pavilion that require specialized abatement (LBP excluded). Vendor will be notified by the project CMc of any such specialized abatement needs and Vendor shall respond to abate within one (1) working day of notification. Vendor shall bill their work via generally accepted commercial time and material rates to the Commission. This requires Vendor to effectively be “on call” beyond the defined ACM abatement preceding demolition and defined herein as completed by October 22, 2021. This period of on-call availability is anticipated to conclude at the end of March, 2022 and any unused allowance shall be unbillable. In the event the allowance is insufficient to address unforeseen environmental abatement conditions encountered during demolition, the Commission may elect to increase the allowance at its sole discretion.

Contractor shall comply with all Federal, State, and local laws, regulations, ordinances, and codes and have current licenses or permits required to perform the services under this proposal.

Proposals should include all labor, materials, equipment, abated material debris/trash removal, transpiration, services, general liability insurance, workmen’s compensation insurance, and permits required for compliance with local codes and ordinances.

Vendor shall be required to secure all required local and state approvals including, but not limited to, work notices and final air clearance sampling (required to pass).

Any physical obstacles to identifying, tracing, and removing any ACM may be removed at time of abatement by vendor with non-ACM demolished materials being left in the buildings or moved to dumpsters provided by the Fairgrounds or its contractor.

Vendor pricing should include general pricing based on cited materials in the Exhibit A. Examples of this could include linear foot cost for asbestos insulated piping and/or valves. The purpose of this pricing data is to establish a baseline cost for those quantities and types of abatement required but not yet identified via aggressive investigatory demolition.

Vendor proposal shall stipulate vendor’s availability and intent to fully perform their abatement work and complete within the following dates: Starting **October 28th 2021** and the Swine Barn facilities abatement completed within five (5) days and the Operations Building within ten (10) working days, **with all abatement work completed no later than November 30, 2021**. Upon completion, vendor will provide any commercially recognized certifications of completion and documented evidence of properly disposed hazardous materials abated such as material disposition manifest(s).
