

BIRTHING CENTER

Tour the Birthing Center to see what new baby animals have been born. Watch the ducks enjoy their pond.

A calf grows inside its mother for how many days before it's born? _____

Approximately how many piglets does a sow (mama pig) have in a litter? _____

Most veterinarians go to college an average of how many years? _____

MILKING PARLOR

Watch the scheduled demonstration at the Milking Parlor to learn about dairy cattle and how the milk you drink goes from the cow to your refrigerator.

How much water does a dairy cow drink each day? _____

How much milk does one cow produce per day? _____

GOLDEN PLAINS LLAMA ASSOCIATION

Take a moment to visit the Llama and Alpaca display in the Dairy Tie Barn. Llama/ Alpaca fleece is a natural fiber harvested annually by shearing the animals, which is similar to sheep shearing. The process of shearing does not hurt them.

How is llama/alpaca wool different than sheep wool? _____

Llamas & Alpacas have two-toed feet with leathery bottoms, which makes them excellent pack animals. They can carry what percentage of their body weight? _____

AGRILAND

Visit Agriland in the Pride of Kansas Building. Learn about Kansas agriculture and the important role it plays in our lives everyday. How many different soil types can be found within the 52 million surface acres of Kansas? _____

One acre of soybeans can be used to make how many crayons? _____

Name at least two Kansas crops that livestock eat? _____

KANSAS FFA AGRICULTURE EXHIBIT

Stop by the FFA Agriculture Exhibit where you find the Grand Champion animals. In addition, you can engage in hands-on agriculture activities and check out the pollinator garden.

One out of every _____ bites of food we eat exists because of animal pollinators.

What is the purpose of the Grand Champion agriculture mechanics exhibit built by a Kansas FFA member? _____

What are the three components of the high school agriculture education model? _____

WHO? Everyone!

Especially young children, older individuals and people with weakened immune systems.

WHEN? Always Wash Hands

- After touching animals or their living area
- After leaving the animal area
- After taking off dirty clothes or shoes
