

Grandstand Project Proposal

Linn County Fairgrounds
Summer 2023

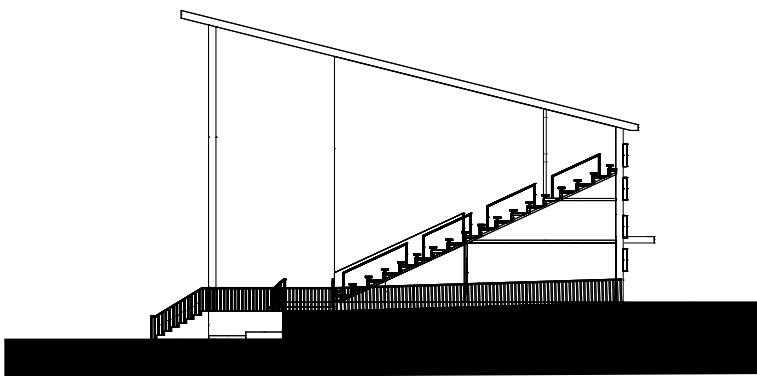

ISU Rising Star Intern Lila Krall, 2nd Year Architecture

The Linn County Fairgrounds are in need of a new grandstand. Currently, a variety of events take place at the grandstand such as concerts, a truck and tractor pull, donkey races, etc. The grandstand is outdated, unsafe, and unable to cater to the growing fair's attendance. However, building an entire new grandstand requires a design plan and fundraising. Throughout the summer, ISU Extension intern Lila, worked with many fair association members to gain insight on what the new grandstand should look like. The new design focuses on considerations such as:

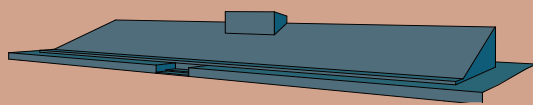

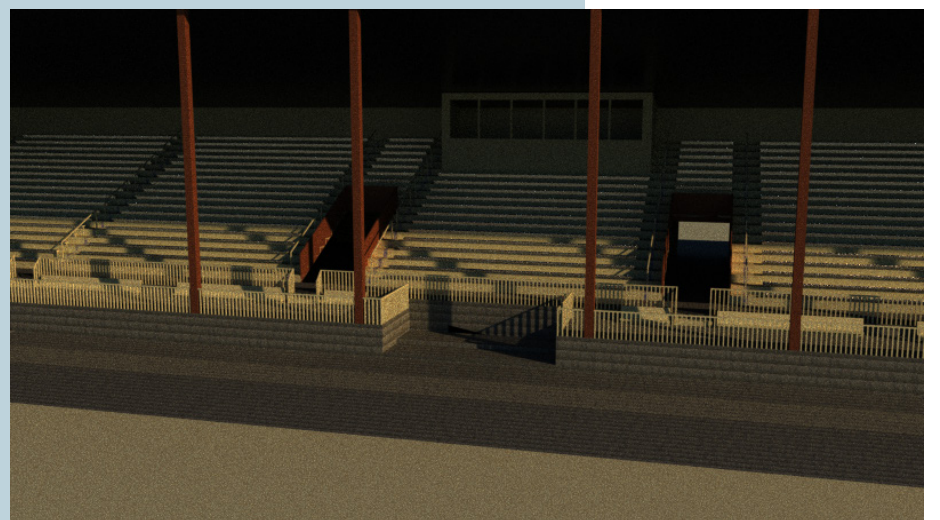

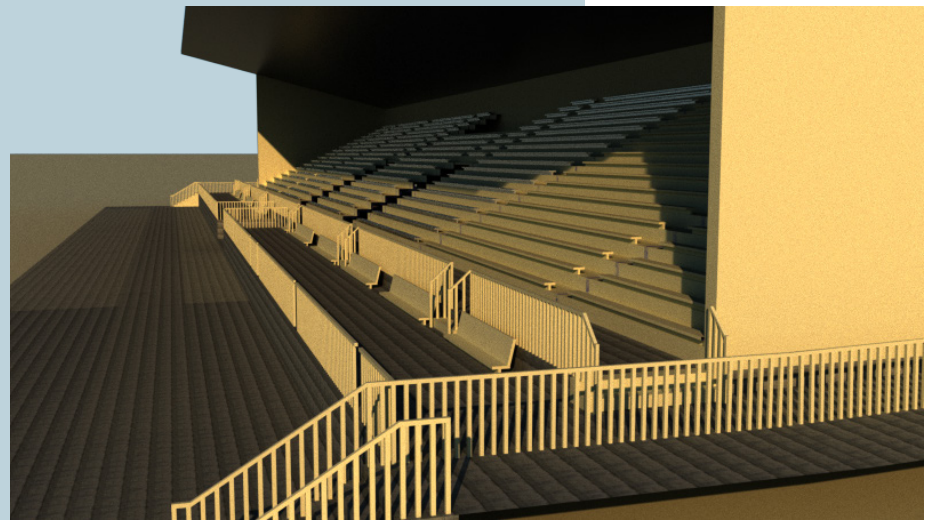

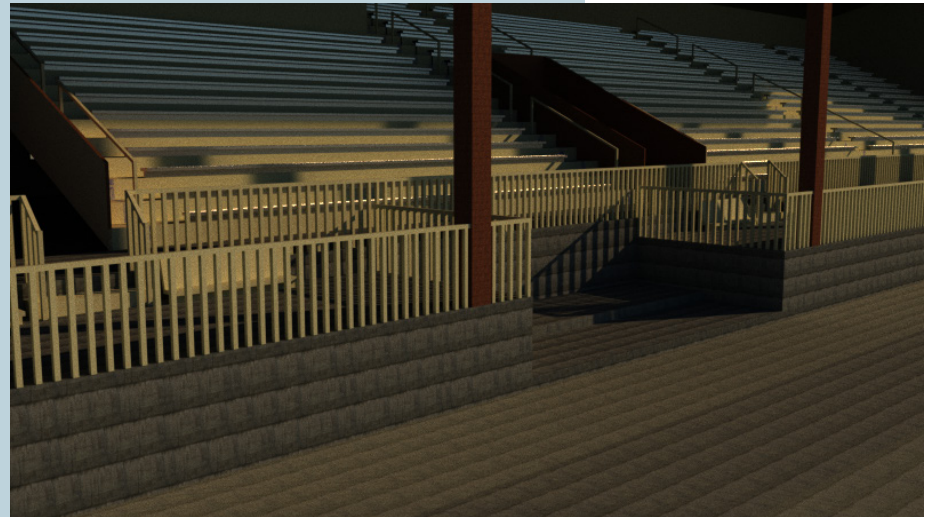

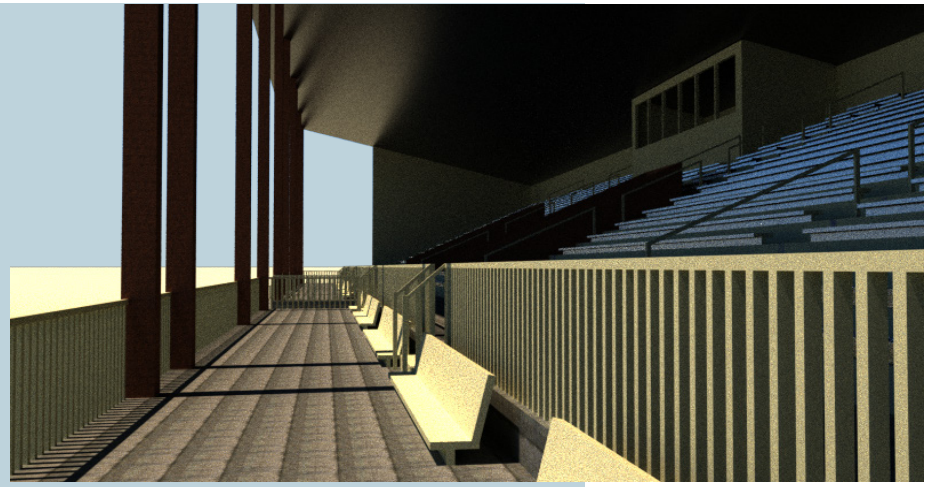

- capacity
- entrance/exit points
- space utilization underneath the grandstand
- versatile seating
- sound equipment setup
- accessibility

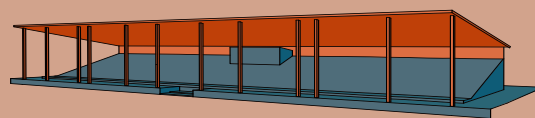

Floor Plans

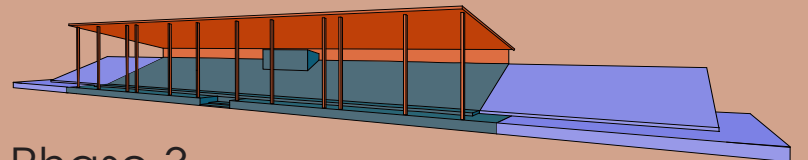

Section

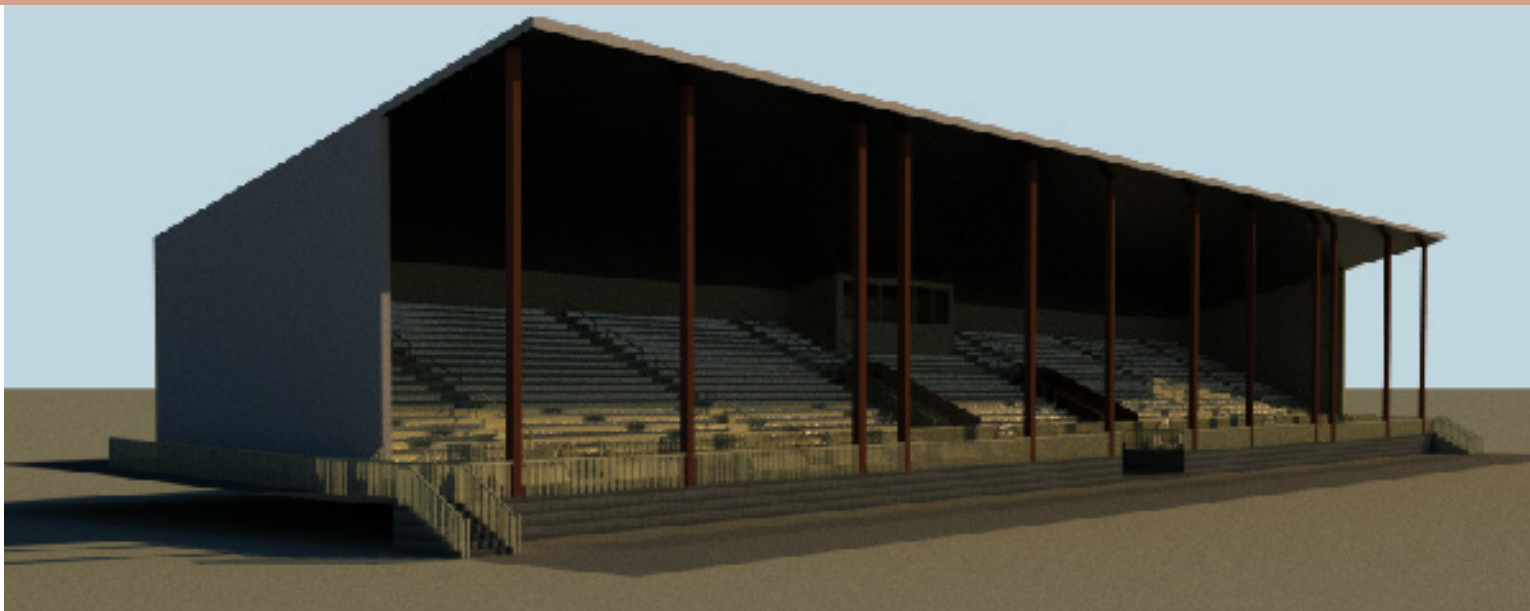

Phase 1

Phase 2

Phase 3

Due to fundraising and time constraints, this project will need to be done in phases. Phase 1 will be the most expensive and time consuming as it will include the main structure, concrete, and seating. Phase two could include a roof, and phase 3 could add additional seating. Images demonstrate phase 1 and 2.
