Truck Racing 2026

1. Any 2 wheel drive truck 4wd pickups must have front driveline removed no four-wheel-drive allowed to race

2. The driver's side door must be protected with a minimum of 2 rows of metal that extend at least 6 inches past both ends of the door onto the fender and bed. Grader blade or equivalent type metal. Any sharp edges are to be rounded off.

3. Front radiator protection is allowed with custom bumpers within reason. It cannot be wider than the front bumper of the pickup and will contain no sharp edges.

4. A roll bar mounted in bed is required. The bar should be made of minimum of 1-3/4" .090 steel tubing and welded to the frame of pickup with angled supports to wheel wells. Any cross bracing cannot obstruct opening to the rear window. Tubing can be welded to a 6" x 6" plate mounted to the bed floor instead of the frame if preferred.

5. A fire extinguisher will be mounted inside the cab within reach of the driver. Fire suppression is preferred.

6. DOT approved helmets must be worn. Full face helmet with shield or goggles suggested.

7. Seat belts must be worn. Five (5) point racing harness preferred.

8. Full wrap around mudflats, must reach from rear fender to rear fender

9. All glass will be removed any broken glass shall be removed. All trim, body chrome, head & tail lights, and loose parts must be removed.

10. The driver's side must be covered in expanded metal or a shatter proof race screen can be used to protect the driver.

11. Stock tanks must be removed from inside the cab. stock tanks or fuel cell tanks shall be mounted behind the cab in the bed only stock tanks will be allowed under the bed. Trucks with electric Fuel pumps need to have the letter E painted on the side.

12. Number board is required with contrasting colors, no fixed objects shall be stick above the number board. Flags can be flown but on a flexible mount.

13. No dually rear ends.
