

AUGUST CROP REPORT

August Status: Oregon Wheat

The Oregon wheat harvest is beginning to wrap up in many areas of the state, but continues in higher elevations. USDA estimates winter wheat harvest for Oregon at 95% complete for the week ended August 17th, which is just slightly ahead of the 5 year average of 91% complete.

Crop Quality Report

The week three crop quality report is now available from the Wheat Marketing Center. Data is still only based on a portion of the production area so should not yet be used as a full reflection of the 2025 crop. For soft white, the sampling reflects:

- Test weight at 61.1 lb/bu, slightly higher than the 5-year average of 60.7.
- Moisture content at 9.2%, higher than the 5-year average of 9.0%.
- Protein content at 10.0%, lower than the 5-year average of 10.3%.
- Falling number value 314, lower than the 5-year average of 330 seconds.
- Dockage at 0.4%
