

# SEPTEMBER CROP REPORT

---

## September Status: Oregon Wheat

Harvest is nearly complete for Oregon, with the final high elevation areas finishing work. As we turn towards seeding for the next year's crop, this will be the final crop update harvest report for 2025.

Crop progress estimates are provided by the U.S. Department of Agriculture National Ag Statistic Service.

## Crop Quality Report

The week 5 report from the Wheat Marketing Center is now available. For soft white, the sampling reflects:

- Test weight at 61.1 lb/bu, higher than the 5-year average (60.7)
- Moisture content at 9.3%
- Protein content at 10.0%, slightly lower than the 5-year average of 10.2%.
- Average falling number value lower than the 5-year average of 315 seconds.
