**Minimum Standards:**

1. Minimum and maximum for carcass weight, 30 to 70 pounds.
2. Minimum and maximum adjusted fat thickness at the 12th rib, .05 inches to .25 inches, respectively.
3. Estimated percent boneless closely trimmed retail cuts from the leg, loin, rack and shoulder will be calculated and considered during final ranking.  
 $\% \text{ BCTRC} = 49.936 - (0.0848 \times \text{Warm Carcass Wt., lb.})$   
 $- (4.376 \times \text{Adj. Fat Thickness, in.})$   
 $- (3.530 \times \text{Body Wall Thickness, in.})$   
 $+ (2.456 \times \text{Ribeye Area, in.}^2)$
4. Carcass must show no evidence of spool joints on the foreshanks.
5. Carcass shall be free of serious bruises ("old" not recent), free of injection sites on the more valuable carcass parts - leg, loin, rack and shoulder (neck excluded) and free of any evidence of surgical altering of the live goat.  
 Goats achieving the above standards will be evaluated and placed by the official carcass judge.
