Minimum Standards

1. Minimum and maximum for carcass weight, 45 to 100 pounds, respectively.
2. Minimum and maximum adjusted fat thickness at the 12th rib, .10 inches to .30 inches, respectively.
3. Maximum USDA Yield Grade, 3.4. The USDA Yield Grade will be determined according to USDA (1994) grading standards. USDA Yield Grade = 0.4 + (10 x adjusted fat thickness, inches)
4. Estimated percent boneless closely trimmed retail cuts (%BCTRC) from the leg, loin, rack and shoulder is used in ranking.

% BCTRC = 49.936 - (0.0848 X Warm Carcass Wt., lb.)

- (4.376 X Adj. Fat Thickness, 12th rib, in.)

- (3.530 X Body Wall Thickness, in.)

+ (2.456 X Ribeye Area, square in.)

5. Carcass must be of "Lamb Maturity."

6. Minimum USDA Quality Grade must be Choice-minus.

7. Carcass shall be free of serious bruises ("old" not recent), free of injection sites on the more valuable carcass parts: leg, loin, rack and shoulder (neck excluded) and free of any evidence of surgical altering of the live wether lamb.

Lambs achieving the above standards will be evaluated and placed by the official carcass judge.
