

2022
DEPARTMENT 30-39
CANNING

As we continue to plan for The Big E fair to be held September 16 through October 2 of 2022 our **exhibitor handbooks and schedules are subject to change** and we suggest you request to be added to the email lists of the departments you are entering, follow the department Facebook page, or check our website frequently for updates.

Email CreativeArts@TheBigE.com to request to be added to be added to our email list.

CANNING (DEPARTMENTS 30-39) RULES

All exhibitors are required to read and comply with the GENERAL RULES AND REGULATIONS of the Creative Arts Department and to acknowledge with entry submission that they have obtained copyright permission when appropriate.				
Entry Form Due	August 15	Online: https://TheBigE.fairwire.com/		
Entry Fee per Item	\$5			
Entry Limit	3 entries per Department in Departments 30-39			
Classes	A: Adult Professional	B: Adult Non-Professional	C: Youth 13-18	D: Youth 5-12
Premiums	Best of Department: \$20	Blue: \$20	Red: \$17	White: \$14
Receiving	Wednesday, September 7: 8:00 am to 7:00 pm		New England Center	
Judging	Closed to the public	Thursday, September 8 -- Saturday, September 10		
Release	Monday, October 3, 12:00 pm to 7:00 pm	Tuesday, October 4, 8:00 am to 1:00 pm	New England Center	
After November 1, all unclaimed items become the property of Eastern States Exposition and will be disposed of as deemed necessary.				
For additional information, contact Creative Arts at Creativearts@TheBigE.com or call (413) 205-5015.				

1. All entries must have been preserved after September 1 of the prior year.
2. Unsealed exhibits or exhibits showing signs of spoilage will not be judged.
3. Exhibits must be **labeled** with the **name of the food** and the **date preserved**. Entries without required labeling will not be judged.
4. Each exhibit must be accompanied by the recipe, processing method and time used. Recipes should be typed or neatly printed as well as credit given to the recipe source. Exhibitor's name and address must be included on the back of the recipe. **All recipes must be on 3 X 5 index card or printed and cut to 3 x 5.**
5. All recipes become the property of Eastern States Exposition and may be edited, adapted, copyrighted, published, and used for publicity, promotion and/or advertising at their discretion without compensation to the contestant.
6. All exhibitors are to follow the current USDA requirements for the items canned as described in the USDA publication "Complete Guide to Home Canning," which can be found at the National Center for Home Food Preservation at the University of Georgia, http://nchfp.uga.edu/publications/publications_usda.html.

7. Exhibits will be judged using the Danish system and will receive an award or placing only if determined worthy by the judge(s).
8. The decisions of the judge(s) are final.
9. Containers:
 - a) All exhibits must be canned in clear, non-colored glass commercial canning jars with a flat metal lid (part of the 2-part lid system recommended by USDA).
 - b) All jams and jellies and preserves must be canned in ½ pint jars.
 - c) All fruits and vegetables must be canned in pint or quart jars.
 - d) All pickles, relishes, salsas, honey, and syrups must be canned in pint jars.
 - e) All Sauces and Salsas must be in pint or quart jars.
 - f) All Vinegars:
 - a. All containers must be clean, clear glass. No cracks, chips, or rust.
 - b. Size- may not exceed 34 oz. or 1 Liter.
 - c. Covers/caps must be clean, free of damage, rust free, non-corrodible and easily removed. Corks must be new. Spring or levered fasteners must have new rubber seals.
 - g) **Identification tags:** Tags should be taped to the bottom of EACH jar. Tags may be obtained from the website (www.TheBigE.com/creativearts). Feel free to photocopy. Please attach identification tags prior to arriving on receiving day to make check-in quicker.
 - h) Headspace required as specified in the current publication of “Complete Guide to Home Canning” published by the USDA.
 - i) Fancy padded lids, fabric overwraps or cozies interfere with the judging process and should not be used.
 - j) **For judging purposes, the product is to be exhibited without the screw band in place for all Jellies, Jams, Vegetables, Fruits, Preserves, Pickles and Relishes.** Please remove your screw bands on Receiving day and take them with you. We are not responsible for missing screw bands. Please remember to bring your screw bands with you on Pick up days to transport your canning safely. If you mail in your entry, leave screw bands on and we will remove them prior to judging for you and ship them back to you with screw bands in place.
 - k) Jars not clean are subject to disqualification.
10. Awards will be made based on appearance, packing, color, clarity, consistency, head space and container. Flavored vinegar evaluations will include olfactory examination.

2022
DEPARTMENT 36
HONEY

As we continue to plan for The Big E fair to be held September 16 through October 2 of 2022 our **exhibitor handbooks and schedules are subject to change** and we suggest you request to be added to the email lists of the departments you are entering, follow the department Facebook page, or check our website frequently for updates.

Email CreativeArts@TheBigE.com to request to be added to be added to our email list.

Division 3601 2 Jars Extracted and Bottled Honey in Queen-line Bottles

Division 3602 2 Jars Extracted and Bottled Honey in Ball Jars

Division 3603 2 Jars Chunk Comb Honey in Ball Jars or other canning jars

Division 3604 2 Jars Round Comb Honey and Rectangular Comb Honey

Honey by Pamela Rys

2022
HONEY GUIDELINES

There are some general criteria for judging honey regardless of the category or entrant experience level. These areas are:

- A. Percent Moisture content as measured by refractometer. It is essential that honey be bottled at 18.5% moisture or less. This is usually the case when the extracted honey is from closed combs. At 18.5% or less, the honey will not ferment, above 18.5% and the honey can ferment and become a form of mead, or mold. The method to measure moisture content is with a refractometer. A handheld refractometer is a very simple device which uses light to project a refracted image on a scale measuring the amount of water. Another method (which is more expensive), is with an electronic refractometer. Either will work, one is analog, the other digital. Moisture above 18.5% is a criterion for rejection of a sample for further consideration.

- B. Clarity of the honey. This is less applicable to the comb honey since there is a minimum of free honey in these samples. The items that we are looking for are foam, foreign material (either dust, dirt, wax particles, or bee parts, etc.), and entrapped bubbles. Visual review of the sample can work, but the best way to judge such samples is with a Polarimeter which uses polarized light to highlight imperfections in the clear liquid honey. The measurement of these parameters can be used to differentiate various samples of honey.

C. Flavor: this is very subjective and not a good criterion for judging except when of such a nature as objectionable.

D. Other criteria are dependent upon the category:

1. Extracted and Bottled Honey in Queen-line Bottles

- a. The extracted honey should be filled into the bottle to reach the “queen-line” which is a raised glass bar on the side of the bottle. This is done to provide a rather precise measurement of the honey to the 1-pound level for the jar.
- b. There should be no floating foam, or visual crystallization of the honey. Crystallization of the honey does not affect the palatability of the honey or its ability to be consumed but is not considered a beneficial aspect of jarred honey.
- c. Bee parts should not be present in the honey.

2022

2. Extracted and Bottled Honey in Ball Jars

- a. All the criteria for #1, except that since this is bottled in Ball Jars or Compatible there will be no “queen-line” on the jar. Jars should be filled to the bottom of the screw cap ridges.

3. Chunk Comb Honey in Ball Jars or other canning jars

- a. All the criteria for #2
- b. Also, the chunks of honeycomb should be covered with honey which meets the criteria of extracted honey.
- c. Chunks should be appropriately measured so that they closely meet the dimensions of the container in which they are being displayed/sold. Comb honey traditionally sells for considerably more than extracted honey, since the comb honey is using added resources of the bees to make the comb, which in the case of comb honey, is not being reused. The bees can make considerably more simply extractable honey vs extractable honey and its associated wax comb. Hence to display or sell a small piece of chunk comb in a large container filled with extracted honey is sub-par to a container filled mostly with comb and the void spaces filled with extracted honey.

4. Round Comb Honey and Rectangular Comb Honey

- a. All the criteria of #3 except
- b. Round and rectangular comb honey is usually created using specialized comb frames which produce the round or rectangular sections. Hence, they can then be placed in plastic clamshell containers which fit the size of the round or rectangular comb and there is very little to almost no void space. In this case the filling of the void space is difficult at times or impractical.
- c. Measurement of the free honey is difficult for clarity or moisture content.
- d. However, it is much easier to assess that all the combs have been capped and hence would be below 18.5% moisture since the bees would not cap cells above that level. Judging can be performed based upon the determination of the percent of fully capped comb as well as how neat the comb has been cut and filled the container.

SPECIAL AWARDS FOR HONEY

Selection of award recipient is based on "judge's choice" using criteria set by the donor of the award.

KEVIN ENGLAND

Book awarded to *Judge's Award Best Honey*
