Kite Sun Catcher Part 1

1

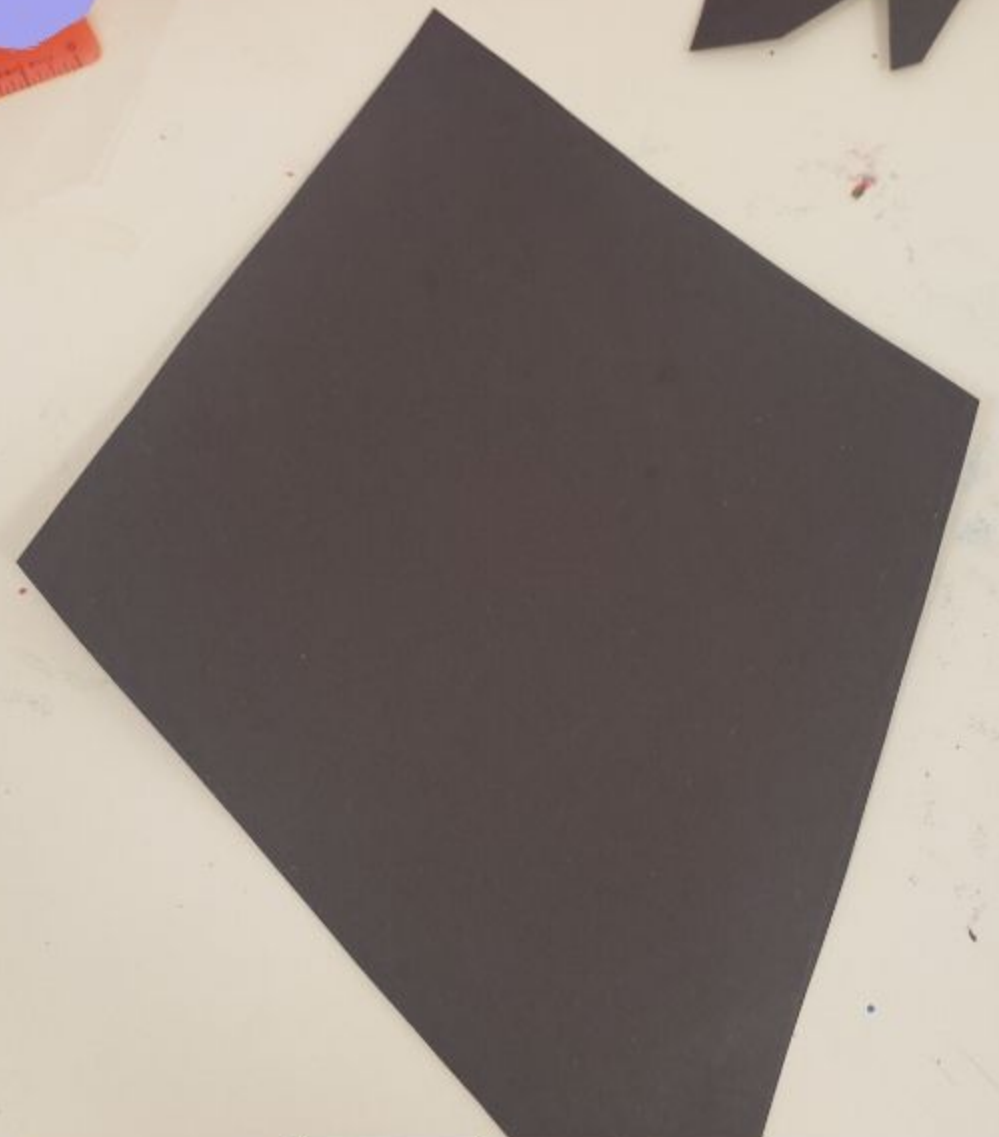

Materials:

- Glue
- Tissue paper
- Ribbon
- Scissors
- Pencil
- Wax paper
- Stapler
- Tape
- Ruler

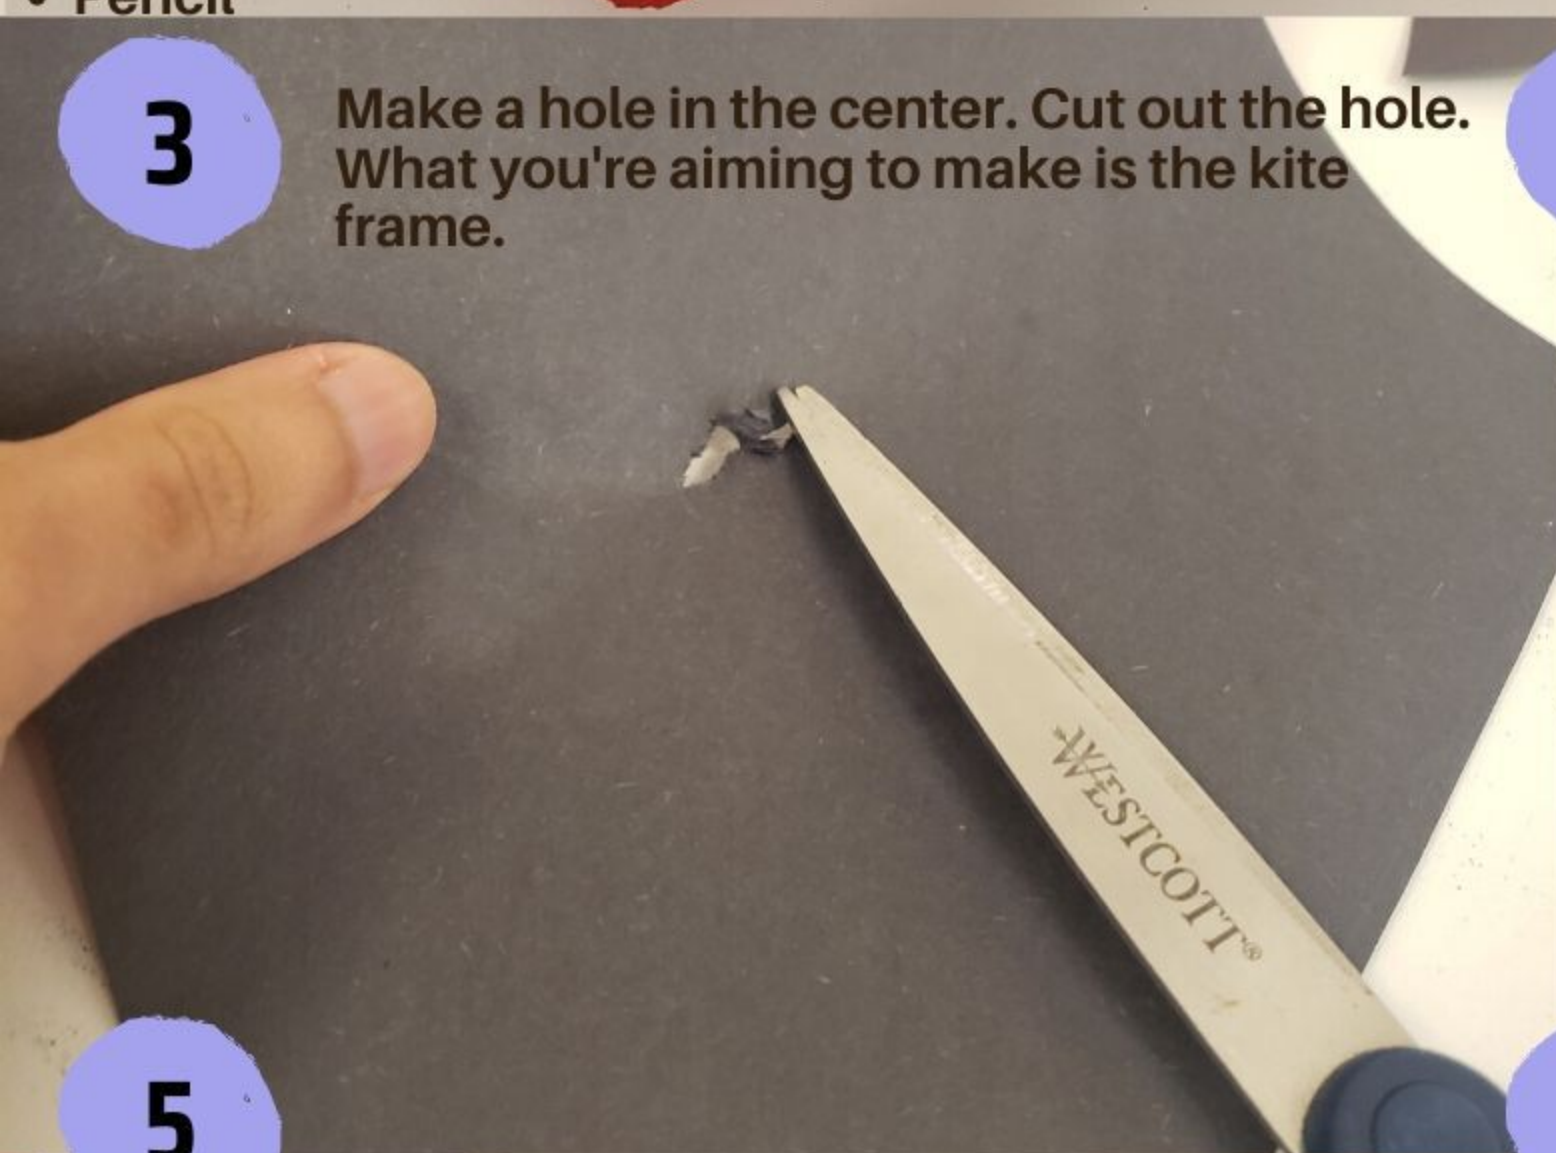

2

Draw & cut out a large diamond shape.

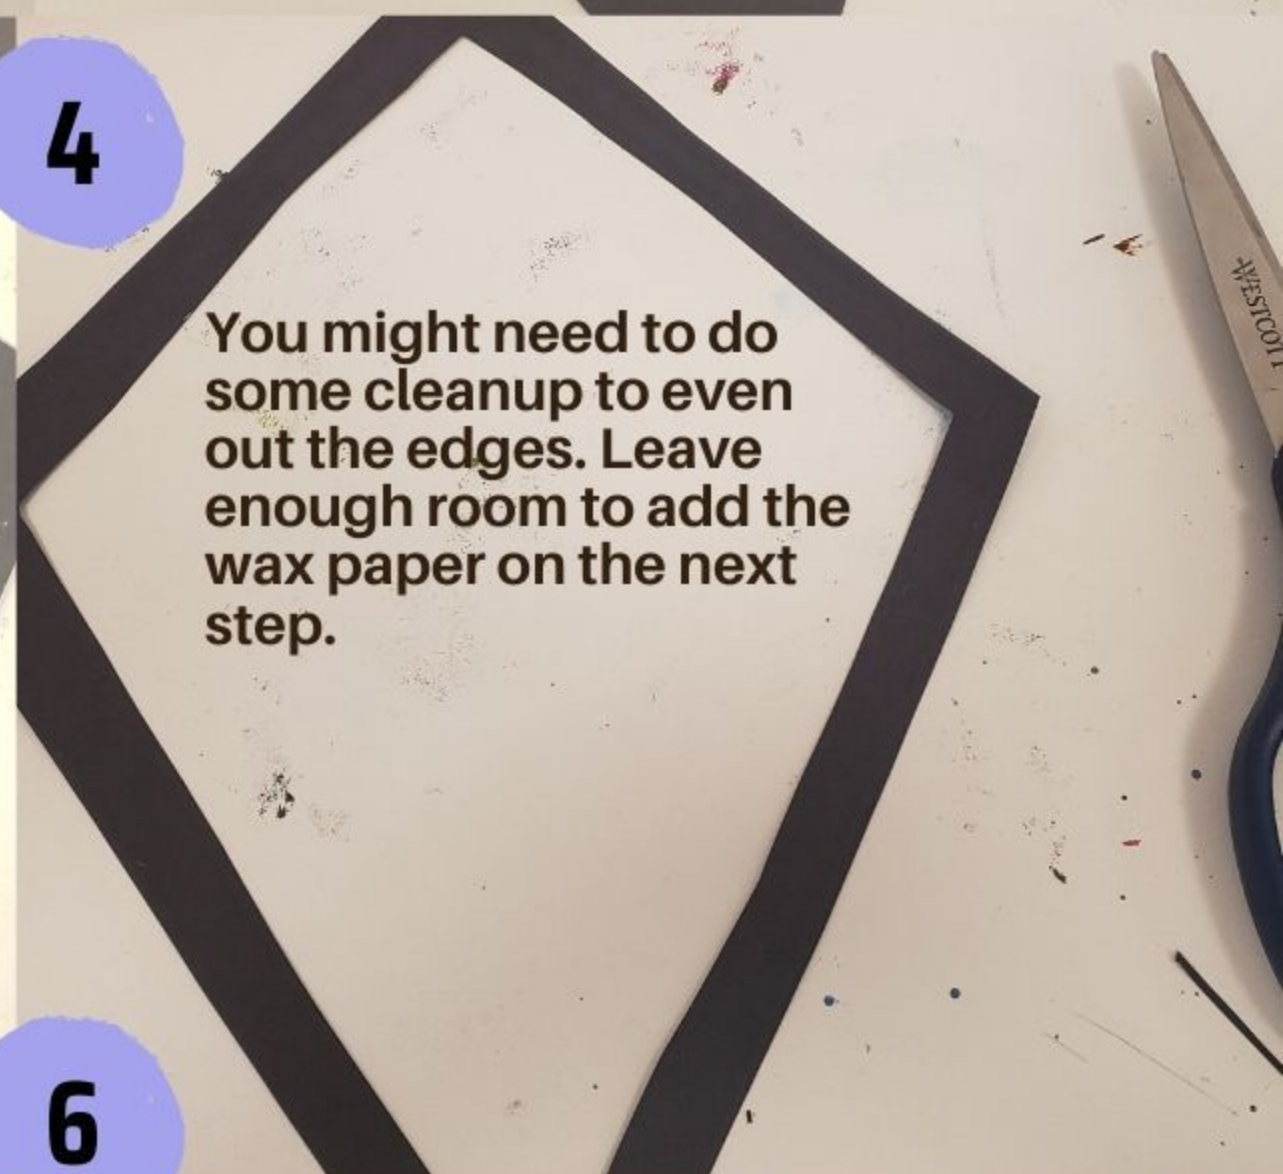

3

Make a hole in the center. Cut out the hole. What you're aiming to make is the kite frame.

4

You might need to do some cleanup to even out the edges. Leave enough room to add the wax paper on the next step.

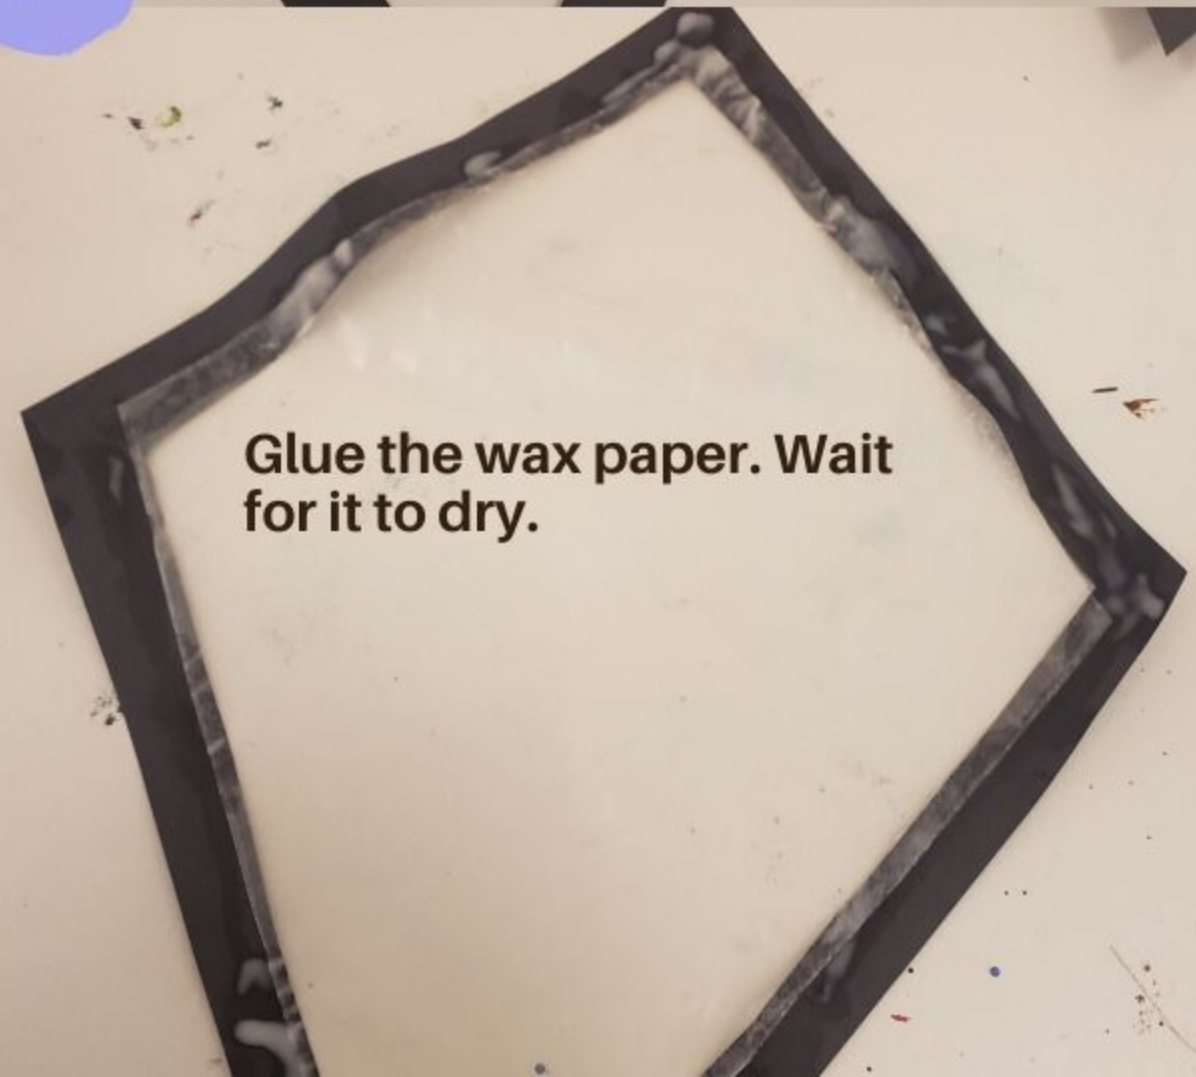

5

Use your pencil to trace the kite & then cut the diamond out of the wax paper.

6

Glue the wax paper. Wait for it to dry.

Kite Sun Catcher Part 2

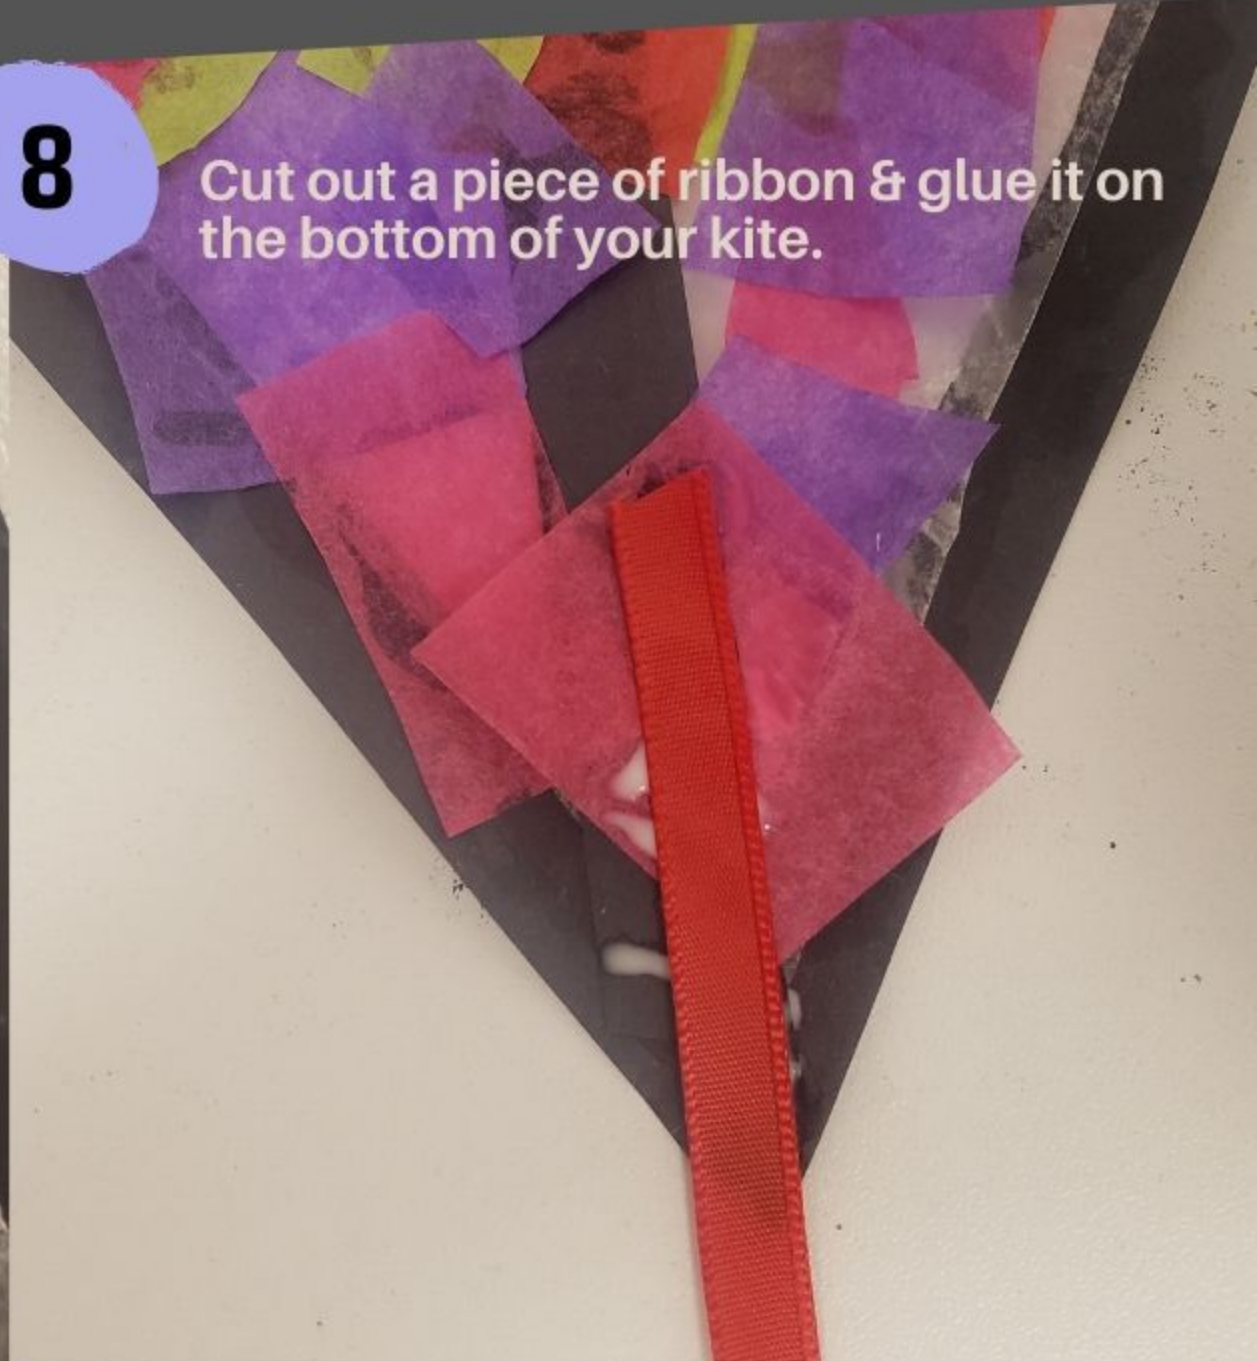

7

Cut out multiple squares from the tissue paper & glue them all over wax paper.

8

Cut out a piece of ribbon & glue it on the bottom of your kite.

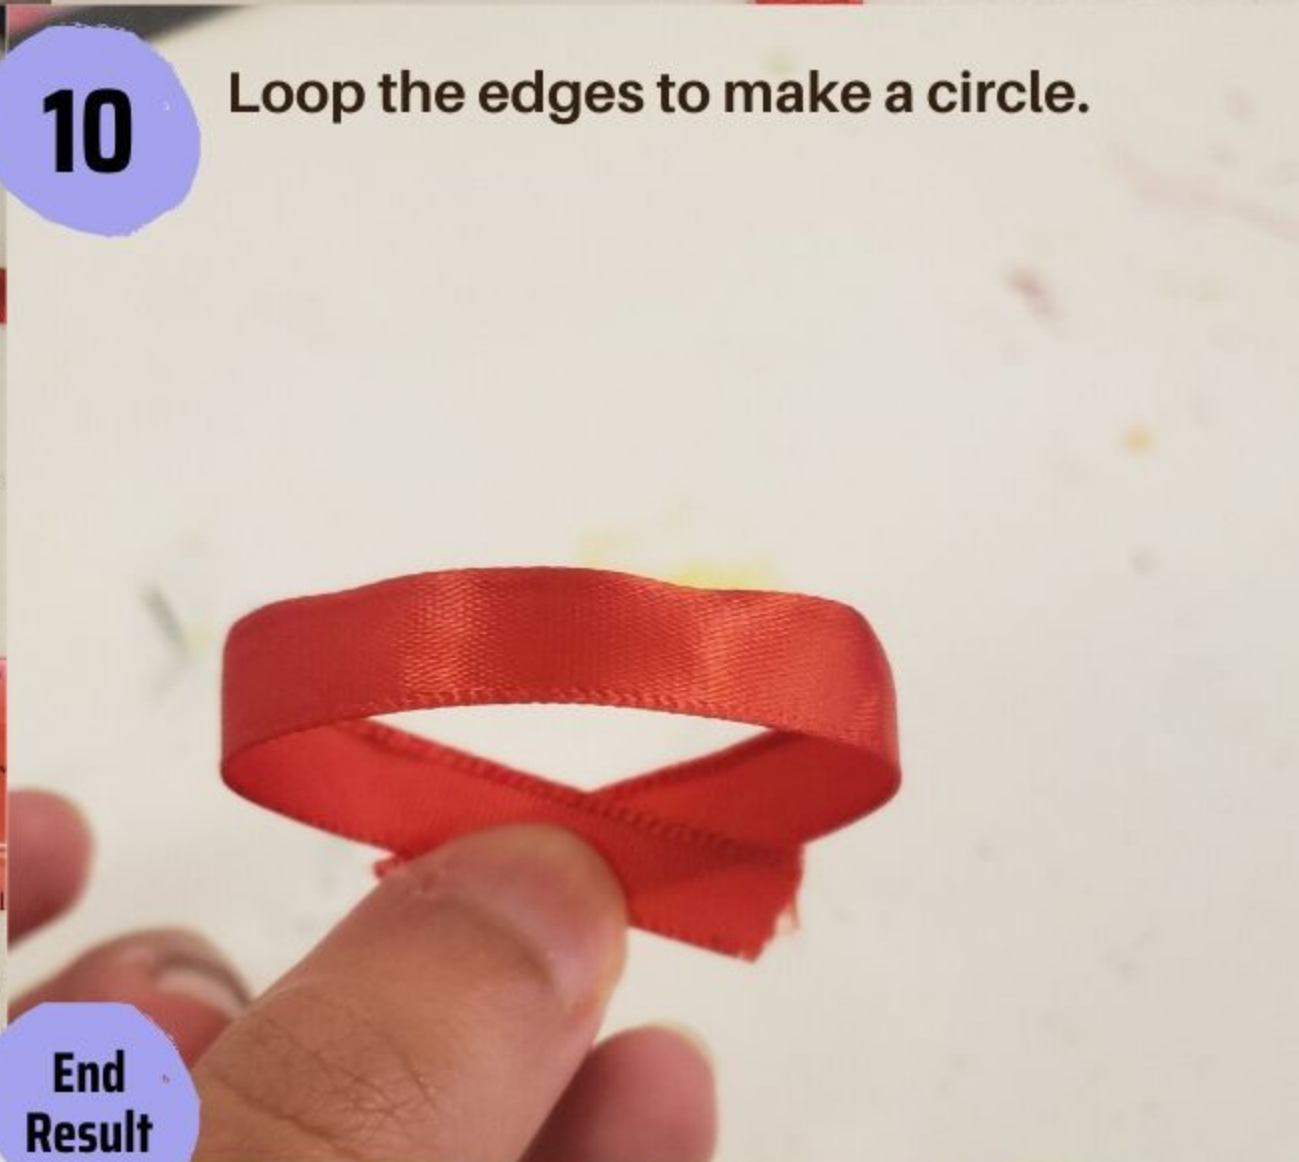

9

Measure another ribbon to be 8.5 inches.

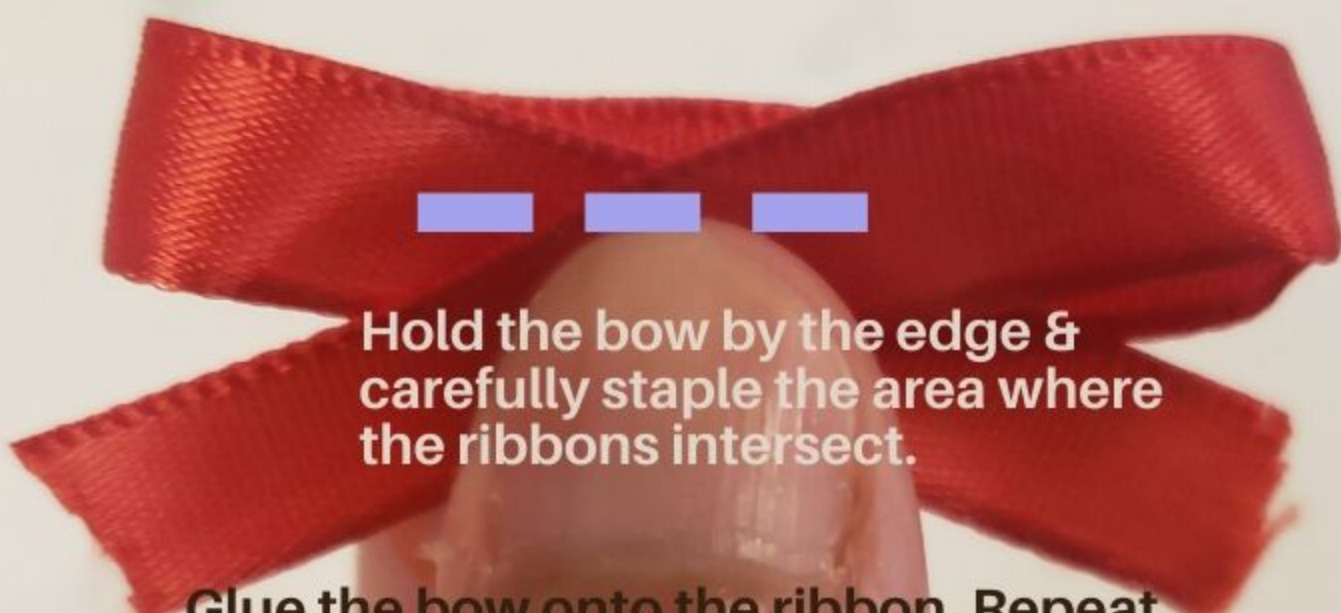

10

Loop the edges to make a circle.

11

Press your thumb down on the top of the circle. The circle should reshape itself into a bow.

Hold the bow by the edge & carefully staple the area where the ribbons intersect.

Glue the bow onto the ribbon. Repeat the process to add multiple bows.

End Result

Tape your kite onto your window & you're done!
