# PAPER CASTLE

A STEP BY STEP TUTORIAL

# Paper Castle Tutorial Part 1

1

## Materials:

- Glue
- Scissors
- Pencil
- Markers
- White, red & brown construction paper

2

Fold the white paper in half twice.

3

Unfold the paper. It should look like this.

4

Close your paper. Cut two lines into the paper. Move the extra paper up & cut it off.

5

This is the shape you will have once removing the excess paper in the middle. Repeat the same cut several times.

6

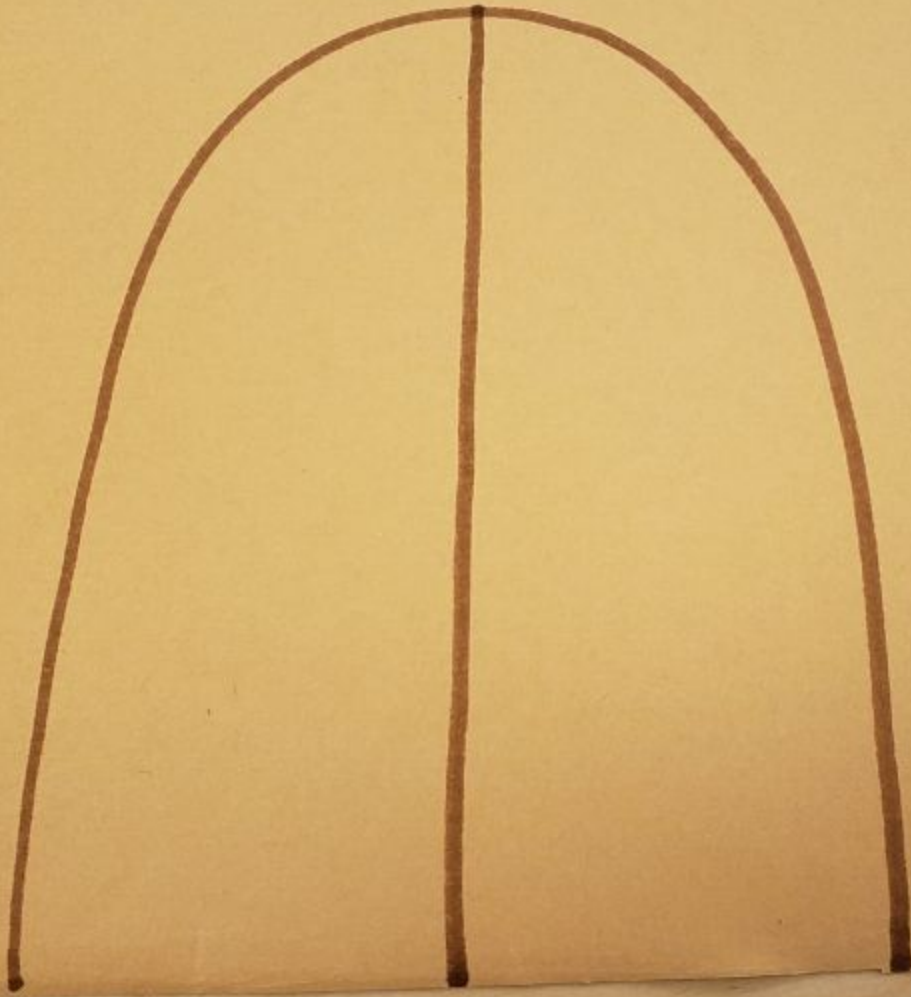

Now you'll have a completed set of crenels on top. You've probably seen this style of architecture on medieval castles

# Paper Castle Tutorial Part 2

**7** Draw a large door on the brown paper. This will be the door to your castle.

**8** Cut the shapes out. Make sure to cut through the middle. Glue these shapes onto your castle.

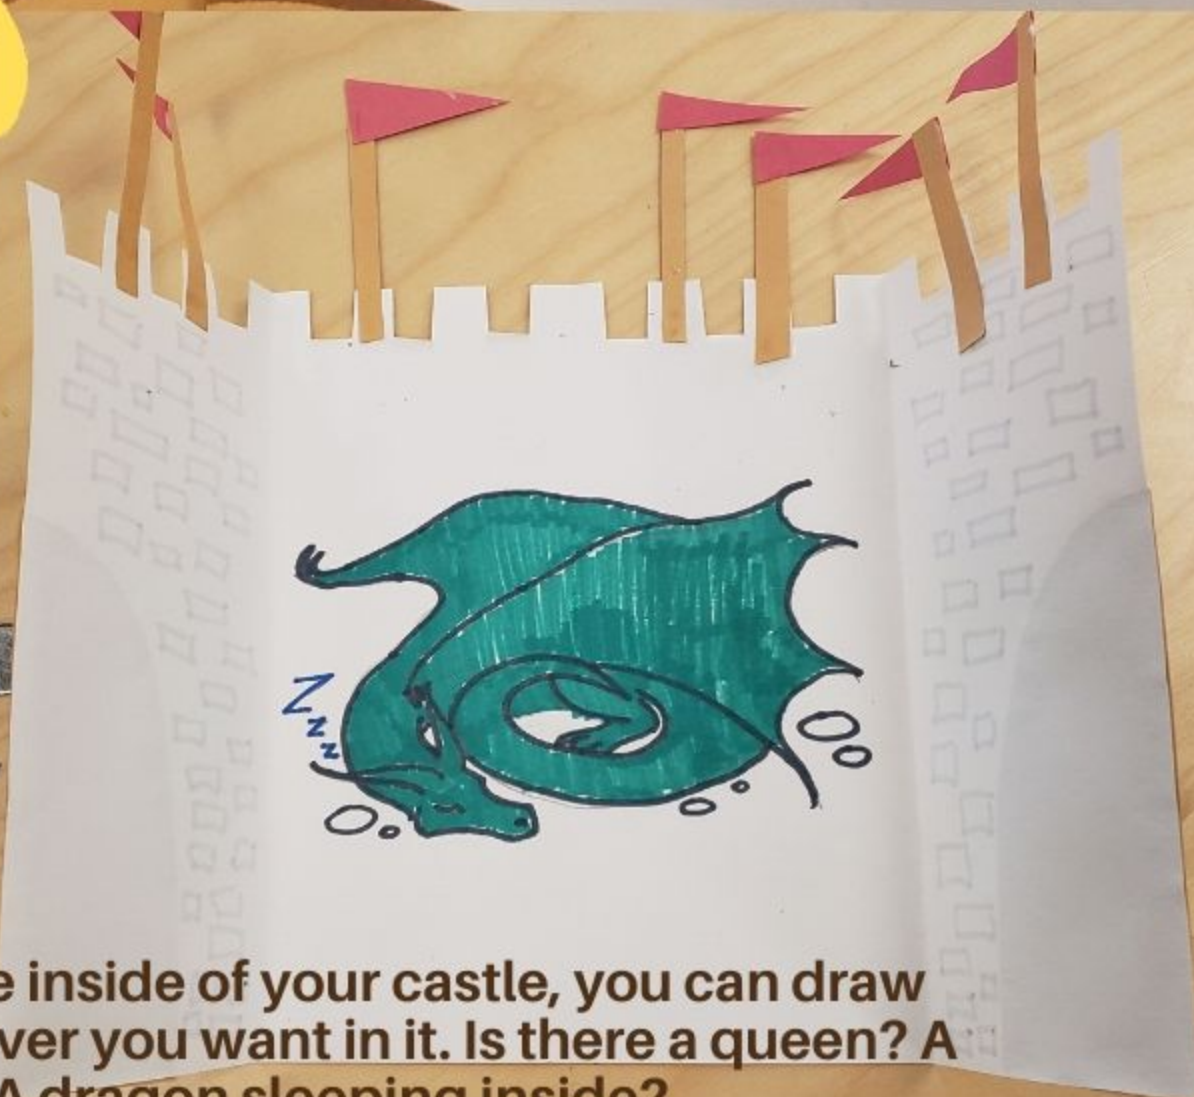

Next, use your marker to draw bricks all over your castle.

**10** Cut out a thin rectangle. Cut a triangle out & glue the triangle onto the rectangle.

Add some glue to the bottom of the flag pole & place it on your castle. You'll want to make multiple flags.

**11**

For the inside of your castle, you can draw whatever you want in it. Is there a queen? A king? A dragon sleeping inside?

**End Result**
