

PAPER TIGER LILY

A STEP BY STEP TUTORIAL

Paper Lilies Part I

1

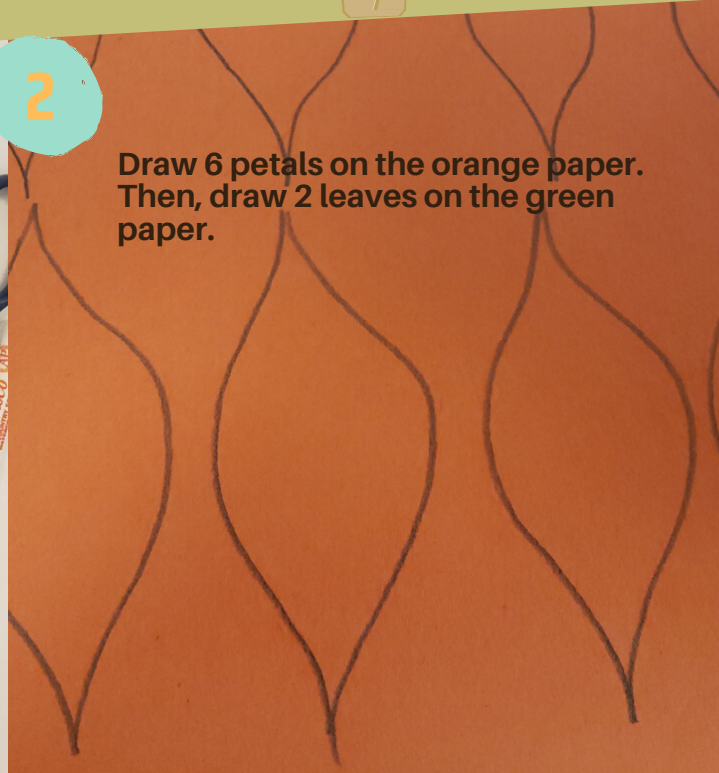

Materials:

- Glue
- Construction paper- orange/green
- Pencil
- Markers- orange/green

2

Draw 6 petals on the orange paper. Then, draw 2 leaves on the green paper.

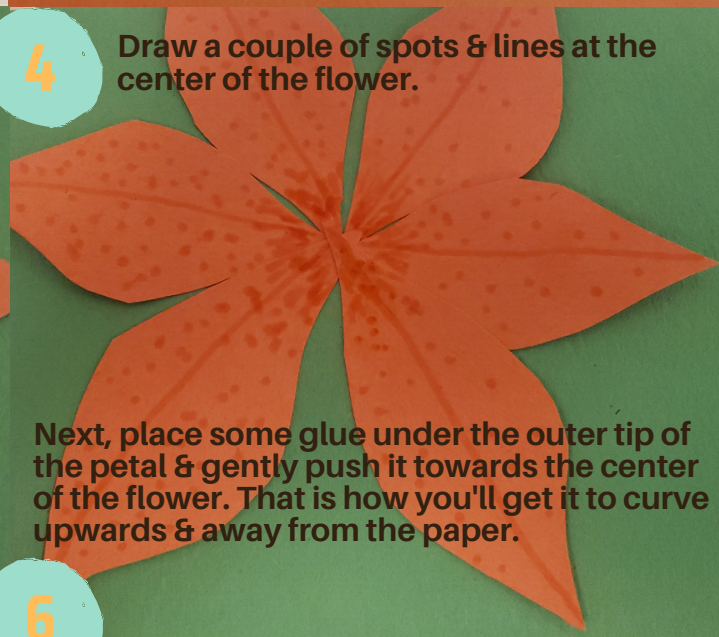

3

Glue the petals together at the center. Wait for them to dry.

4

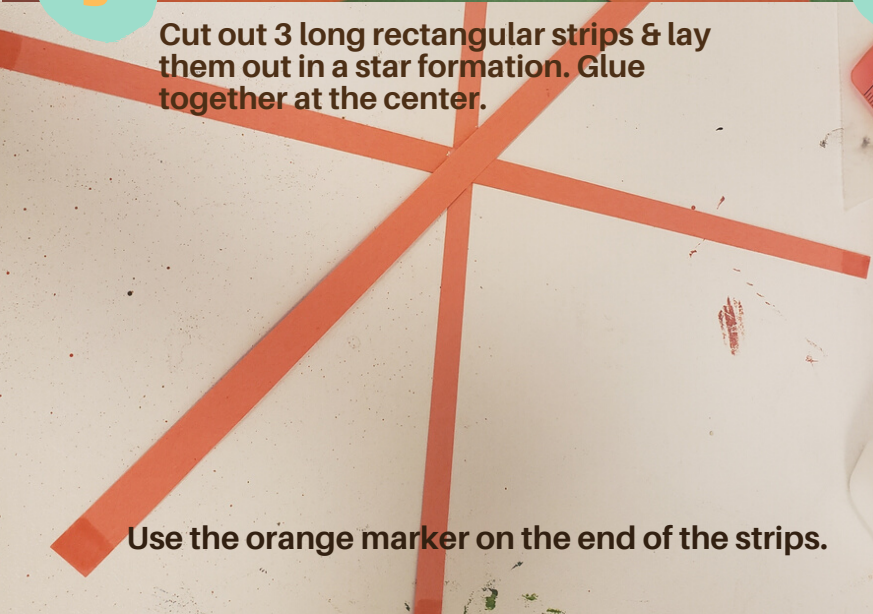

Draw a couple of spots & lines at the center of the flower.

Next, place some glue under the outer tip of the petal & gently push it towards the center of the flower. That is how you'll get it to curve upwards & away from the paper.

5

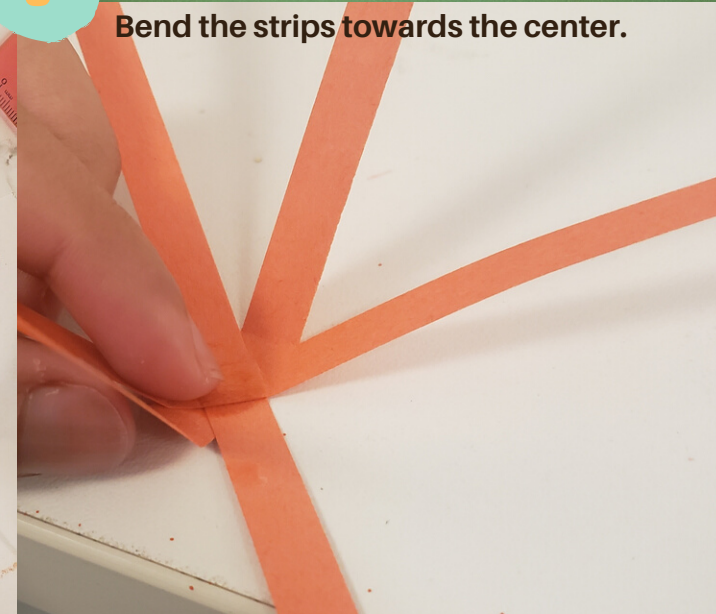

Cut out 3 long rectangular strips & lay them out in a star formation. Glue together at the center.

Use the orange marker on the end of the strips.

6

Bend the strips towards the center.

Paper Lilies Part 2

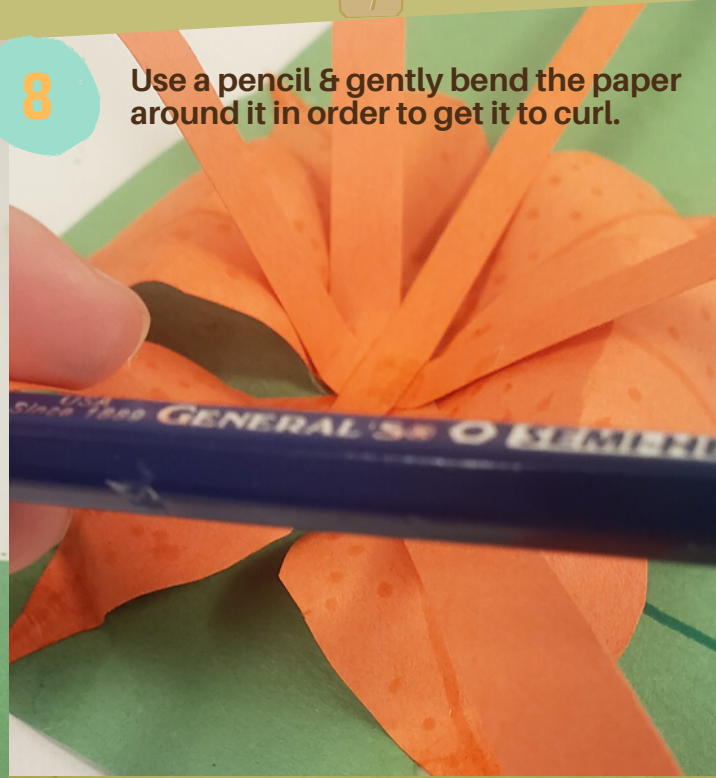

7

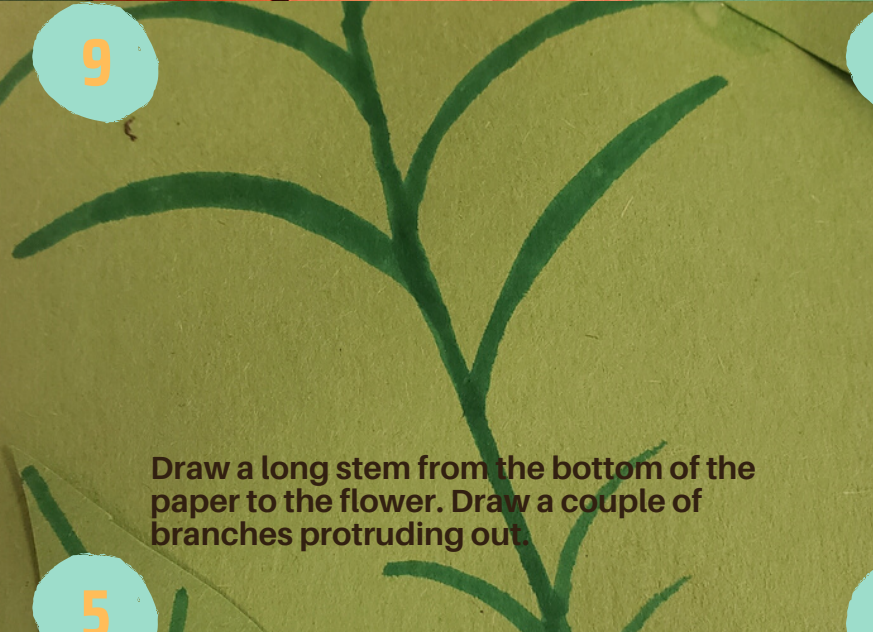

Place the strips at the center of the flower.

8

Use a pencil & gently bend the paper around it in order to get it to curl.

9

Draw a long stem from the bottom of the paper to the flower. Draw a couple of branches protruding out.

5

If you feel the stamens at the center are too long, feel free to cut them shorter.

10

Bring out your two leaves & apply steps 3-4.

End Result
