DIVISION 103 — ANGUS

Fitting Rule: Fitting rule (Rule 11) - Effective July, 2004: At any show for which the American Angus Association (AAA) appropriates funds toward the payment of premiums, no exhibitors, individuals assisting exhibitors or member owners at such show shall be allowed to use any coloring agents, on any animal exhibited. The Association may adopt and implement various tests designed to monitor this prohibition, including but not limited to a "white towel" or "white glove" test. No aerosol cans or other pressurized containers will be allowed in designated make up areas.

AAA Participation: The AAA, 3201 Frederick Avenue, St. Joseph, Missouri, will pay 20% of the total premiums in individual classes offered for Junior Angus Heifers as included in its standard show classification. To be eligible for Association premiums heifer entries must be recorded in the sole name of the junior exhibitor and the processed date on the registration certificate must conform to the individual show's requirements regarding ownership. The Association's contribution is included in the total premiums listed in each class. Premiums from the Association are paid by registration number. Therefore, all cattle should be registered at the time of entry to make certain they receive the Association's portion of premiums.

Ownership: Exhibitors must have the original registration certificate on each animal available for inspection at the show.

Ownership for Angus heifers goes by date of processed, not date of sale.

Tattoos: Any animal upon Check In which does not have a legible tattoo corresponding to its registration certificate is ineligible to show. (Once disqualified due to an incorrect or illegible tattoo, animals cannot be re-tattooed and re-checked at the show. Only one person at a time shall lead animals into the show ring.

Products & Hair: Any product administered internally or used externally to alter the conformation and/or appearance of an animal for exhibition is prohibited. This includes the covering of white skin, false tail heads (or use of any false hair), use of graphite, powders, hemp or other similar substances externally and steroids, growth stimulants or artificial filling internally. Any animal found to be in violation will be barred from showing. The exhibition of cattle displaying false hair will not be allowed, with the exception of false tail switches.

Blood Typing for Parentage Verification: For an exhibitor to be eligible at shows for premium monies contributed by the AAA, each exhibitor is subject to Part 3, Section IX of the Association's rules entitled "Eligibility, Conformation and Structure of Animals Presented for Exhibition". DNA FOR PARENTAGE VERIFICATION. Under the Association Rules each animal for which entry application (registration) is received, may be subjected to a DNA test to verify both ACCURACY OF PARENTAGE AND DNA as covered under Association Rules Part 3, Section II, Rule 2(F). Staff of the American Angus Association must supervise the collection of DNA samples. Animals are often sampled at shows, fairs or events where the American Angus Association contributes premiums or where Association personnel participate. If a recorded parent is excluded (as a parent) as a result of DNA, the owner may request, at his own expense, the Association to determine the actual parent. Failure to determine the sire and dam disqualifies the animal's eligibility in the Angus Herd Book, and the registration certificate becomes null and void.
