Certified Litter Class: 2 animals farrowed after Jan. 1, 2018 any sex.

Must be accompanied with certification affidavit from breed association that litter mates were certified.

Section 10 - Vegetables

- In selecting vegetables for exhibition, choose such specimens that would bring the highest market price. Do not select the largest; select medium size specimens. If at all possible, do not mix varieties.
- The following factors are generally used by an expert vegetable judge:
 - 1. Trueness to variety type. If at all possible, pick the specimens from one variety.
 - Uniformity in shape, size, and color.
 - Be sure to pick out a perfect specimen, then select the others as similar to it as possible. Never mix specimens of different maturity.
 - 4. Protect from dirt, disease, infection, and mechanical damage. Select specimens that are perfect and show no blemishes of any kind.
 - 5. Condition and maturity. Be sure that exhibits are of high quality.

 - 6. Potatoes should not be washed. Remove soil using a soft cloth or brush.
 7. Tomatoes should have stems removed. Carrots, beets, etc. should have tops (leaves) removed from vegetables leaving about (2) two inches of stems.
- Read premium material, carefully following all rules and regulations. If an entry calls for five specimens, be sure to exhibit that number; do not enter four or six. In any instance, your exhibits will be disqualified if the correct number of specimens is not entered.
 - 1. Project I Maximum 6 entries in this section, plus entry 45, 46, 47
 - 2. Project II Maximum 10 entries in this section, plus entry 45, 46, 47
 - 3. Project III- Maximum 15 entries in this section, plus entry 45, 46, 47 (Project
 - III is highest level may be repeated until end of 4-H involvement)
