Rules & Important Information

The Junior Department is for youth who wish to enter one of the categories described below to compete against other youth at the Yolo County Fair. Some exhibitors are members of organizations, such as 4-H and FFA, and there may be some classes and Age Brackets limited to members of such organizations. The Yolo County Fair provides the opportunity for young people who are not members of such organizations to exhibit as well. In some cases, depending on the number of entries, these "independent juniors" compete in the appropriate class in direct competition with an organization member. In other cases, there may be separate classes for independent juniors.

Eligibility & Age Requirements

Open to youth ages 5 to 17 on January 1st.

4-H Department

4-H Youth programs are non-formal voluntary educational programs, under the supervision of the University of California Cooperative Extension and the U.S. Department of Agriculture. The projects exhibited at fairs by members of these groups are the results of their efforts under the supervision of volunteer adults.

FFA Department

FFA is a national organization of students enrolled in high school vocational agriculture classes. The local unit is the chapter in each school offering vocational agriculture, under the supervision of the agricultural teacher who is also the local chapter advisor. The state unit includes all chapters in the state, under the supervision of the State Department of Education as represented by the Bureau of Agricultural Education, with its headquarters at the State Education Building in Sacramento, Calif. The national unit is the group of associates in each state and Puerto Rico, under the supervision of the Agricultural Education Division of the U.S. Office of Health, Education and Welfare in Washington, D.C.

Every Future Farmer project in livestock, poultry, fruit, or crops is part of the practical education of the vocational agriculture student who owns it. The program includes the improvement of agriculture leading to the ownership of the farms and the development of good rural citizenship. Participation in fairs is recognized as having educational value as well as simulation for better results and finer projects.

Industrial Education: Industrial education is an integral part of the total program of education. The branches of learning represented by industrial education are industrial arts and vocational and trade education.

- Industrial Arts Education provides for personal identification with work of industry, for satisfactions that are found in creative artisanship, and for developing values that are important to the consumers of goods and services.
- Vocational and Trade Education develops occupational competencies that prepare people to enter employment in specific industries and service occupations.

JUNIOR LIVESTOCK

The Junior Department is for youth who wish to enter in one of the categories described below to compete against other youth at the Yolo County Fair. Some exhibitors are members of organizations, such as 4-H and FFA, and there may be some classes and divisions limited to members of such organizations. The Yolo County Fair provides the opportunity for young people who are not members of such organizations to exhibit in Youth Yolo Living. In some cases, depending on the number of entries, these "independent juniors" compete in the appropriate class in direct competition with an organization member. In other cases, there may be separate classes for independent juniors.

4-H DEPARTMENT

4-H Youth programs are non-formal voluntary educational programs, under the supervision of the University of California Cooperative Extension and the U.S. Department of Agriculture. The projects exhibited at fairs by members of these groups are the results of their efforts under the supervision of adult volunteers.

FFA DEPARTMENT

FFA is a national organization of students enrolled in high school vocational agriculture classes. The local unit is the chapter in each school offering vocational agriculture, under the supervision of the agricultural teacher who is also the local chapter advisor. The state unit includes all chapters in the state, under the supervision of the State Department of Education as represented by the Bureau of Agricultural Education, with its headquarters at the State Education Building, Sacramento, Calif. The national unit is the group of associates in each state and Puerto

Rico, under the supervision of the Agricultural Education Division of the U.S. Office of Health, Education and Welfare in Washington, D.C. Every Future Farmer project in livestock, poultry, fruit, or crops is part of the practical education of the vocational agriculture student who owns it. The program includes the improvement of agriculture leading to the ownership of the farms and the development of good rural citizenship. Participation in fairs and livestock shows is recognized as having educational value as well as simulation for better results and finer projects, under supervision of the qualified chapter advisor and with the cooperation of the Fair Management.
