OWNER ENDORSED AVIAN HEALTH CERTIFICATE AND BIOSECURITY STATEMENT 2024

Introduction: Highly pathogenic avian influenza is a fatal and contagious disease of poultry, and has led to the loss of more than 65 million birds in the US since 2022. The virus causing this disease can be spread by infected poultry, on poultry products such as feathers and eggs, on clothing and other fomites such as packing materials, and through the air. However, if all protocols for reducing the risk of spreading disease are followed, certain poultry, feathers and eggs may be exhibited, at the Department's discretion.

A completed Owner Endorsed Avian Health Certificate and Biosecurity Statement must accompany all avian species (including poultry), eggs, and feathers to a Pennsylvania exhibition. The certificate must be presented to exhibition management prior to cooping of all avian species or displaying of eggs or feathers. This form must be endorsed with the bird, egg, or feather owner's signature.

Avian. Related to birds.

Poultry. The term "poultry" includes all domesticated fowl, including chickens, turkeys, ostriches, emus, rheas, cassowaries, waterfowl, and game birds (pheasants, partridge, quail, grouse, and guineas); but excludes doves, pigeons, psittacine and passerine birds.
